Syllabus for M. Tech in Data Science (Effective from 2021-22 Admission Session)

Curriculum Structure

Sem-I.

Course Number			eme Of St k	Credits	
		L	T	P	
PGIT(DS)101	Program Core I- Mathematical foundationsof Computer Science	3	0	0	3
PGIT(DS)102	Program Core II- Advanced Data Structures	3	0	0	3
PGIT(DS)103A/B/C	Program Elective I- Data Science/ Distributed Systems/Data Preparation and Analysis		0	0	3
PGIT(DS)104A/B/C	Program Elective II- Recommender Systems /Machine Learning/ Data Visualization	3	0	0	3
PGIT(DS)105	Research Methodology and IPR	2	0	0	2
PGIT(DS)106A/B/C/D	Audit Course	2	0	0	0
PGIT(DS)192	Laboratory 1 (Advanced Data Structures)	0	0	4	2
PGIT(DS)193A/B/C/D	Laboratory 2 (Based on Elective1)	0	0	4	2
PGIT(DS)194A/B/C/D	Laboratory 3 (Based on Elective 2)	0	0	4	2
	Total Credits:20				

Sem-II

Of Stud	e Number Subject	Credits	
Т		T P	
0	Program Core III – Advanced Computer Architecture	0 0	3
0	Program Core IV – Advanced Database	0 0	3
0	Program Elective III – Big Data Analytics/ Data A/B Warehouse and Data Mining	0 0	3
0	Program Elective IV – Data Security/ Web Analytics and A/B/C Development/Knowledge Discovery	0 0	3
0	A/B/C/D Audit Course	0 0	0
0	. Advanced Computer Architecture Lab	0 4	2
0	Advanced Database Lab	0 4	2
0	Big Data Analytics lab/ Data Warehouse and Data Mining lab	0 4	2
0	. Term Paper with Seminar	0 4	2
		<u>†</u>	0 4

^{*}Students be encouraged to go to Industrial Training/Internship for at least 2-3 months during semester break.

Syllabus for M. Tech in Data Science (Effective from 2021-22 Admission Session)

Sem* III

Course No.	Subject		Scheme Periods	Credits	
		L	Т	P	
PGIT(DS)301A/B/C/D	Program Elective V – GPU Computing/ Cloud Computing/ Distributed Databases/ Deep Learning		0	0	03
PGIT(DS)302A/B/C/D/E/F	Distributed Databases/ Deep Learning Open Elective A. Business Analytics B. Industrial Safety C. Operations Research D. Cost Management of Engineering Projects E. Composite Materials F. Waste to Energy		0	0	03
PGIT(DS)381	Dissertation-I /Industrial Project	0	0	20	10
	Total Credits 16	•		•	

*Students going for Industrial Project/Thesis will complete these courses through MOOCs. Sem-IV

Course No.	Subject	Schen Perio	Credits			
		L	T	P		
PGIT(DS)481	Dissertation II	0	0	32	16	
Total Credits: 16						

The program offers several elective courses, focusing on different aspects of Data Science. A student can choose to do any course from given program elective set.

Audit course 1 & 2

106A-English for Research Paper Writing

106B-Disaster Management

106C-Sanskrit for Technical Knowledge

106D-Value Education

205A-Constitution of India

205B-Pedagogy Studies

205C-Stress Management by Yoga

205DPersonality Development through Life Enlightenment Skills.

Syllabus for M. Tech in Data Science (Effective from 2021-22 Admission Session)

Detailed Syllabus

	ne Course: M. Tech. in Data athematical foundations o				
	de: PGIT(DS)101	Semester: I			
Duration:		Maximum Marks: 100			
Teaching S		Examination Scheme			
Theory:3	Jeneme	End Semester Exam: 70			
Tutorial: 0		Attendance: 5			
Practical:0		Continuous Assessment:25			
Credit: 3		Practical Sessional internal continuous ev	zaluation		
Greatt. 5		Practical Sessional external examination:		•	
Aim:		Tractical Sessional external examinations			
Sl. No.					
1.	To understand the basic n	otions of discrete and continuous probabil	itv.		
2.		ds of statistical inference, and the role that		<u></u>	
۷.	distributions play in those		Samping	•	
3.		rect and meaningful statistical analyses of	simple to	moderate	
5.	complexity.				
Objective:					
Sl. No.					
1.	To understand the mather	matical fundamentals that is prerequisites	for a vari	etv of	
	courses like Data mining, Network protocols, analysis of Web traffic, Computer				
		ering, Computer architecture, operating sys	-		
	systems, Bioinformatics, Machine learning.				
2.	To develop the understanding of the mathematical and logical basis to many modern				
	techniques in information technology like machine learning, programming language				
	design, and concurrency.				
3.	To study various sampling	g and classification problems.			
Pre-Requi	site:				
Sl. No.					
1.	Discrete Mathematics				
Contents			3 Hrs./	week	
Chapter	Name of the Topic		Hours	Marks	
01	Probability mass density	and cumulative distribution functions,	7	10	
01		tributions, Expected value, variance,	'		
		pplications of the univariate and			
		Theorem, Probabilistic inequalities,			
	Markov chains	,			
02	Random samples, samplin	g distributions of estimators, Methods of	7	10	
	Moments and Maximum L	ikelihood.			
03	Statistical inference, Intro	duction to multivariate statistical	8	10	
	models: regression and cla	assification problems, principal			
	components analysis, The	problem of overfitting model			
	assessment.				
04		sm, Planar graphs, graph colouring,	11	15	
		er cycles. Permutations and Combinations			
		on. Specialized techniques to solve			
	combinatorial enumeration	•			
05		applications, Data mining, Network	10	15	
	1 1	traffic, Computer security,			
		nputer architecture, operating systems,			
	alstributed systems, Bioin	formatics, Machine learning.			

Syllabus for M. Tech in Data Science (Effective from 2021-22 Admission Session)

06	Recent Trends in various distribution functions in mathmatical field of computer science for varying fields like bioinformatic, soft computing, and computer vision.	5	10
	Sub Total:	48	70
	Internal Assessment Examination & Preparation of Semester Examination	4	30
	Total:	52	100

Assignments: Based on Theory Lecture.

Credit: 3+2		Practical Sessional internal continuous ev	valuation:	40		
		Practical Sessional external examination:				
Aim:		1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1				
Sl. No.						
1.	Single Linked, Double Linked Lists, Stacks, Queues, Searching and Sorting techniques, Trees, Binary trees, representation, traversal, Graphs- storage, traversal.					
2.	Dictionaries, ADT for List, Stack, Queue, Hash table representation, Hash functions, Priority queues, Priority queues using heaps, Search trees.					
3.	AVL trees, operations of AVL trees, Red- Black trees, Splay trees, comparison of search trees.					
Objective:						
	The state of the little	Alle te de conserve de la detectación de	. 1	. 1 (1		
1.	The student should be able to choose appropriate data structures, understand the ADT/libraries, and use it to design algorithms for a specific problem.					
2.	problems.	e to understand the necessary mathematical				
3.	algorithmic problems.	s with advanced paradigms and data structu				
4.	Student should be able	to come up with analysis of efficiency and p	roofs of c	orrectness.		
Pre-Requi	site:					
Sl. No.						
1.	UG level course in Data	a Structures				
Contents			Hrs./w	reek		
Chapter	Name of the Topic		Hours	Marks		
01	Dictionaries. Hashing: Review of Hashing, Ha Techniques in Hashing	Abstract Data Type, Implementation of sh Function, Collision Resolution solution grante Chaining, Open Addressing, atic Probing, Double Hashing, Rehashing,	7	10		
02	Extendible Hashing. Skip Lists:		5	5		
	Need for Randomizing andUpdate Operations Lists, Deterministic Sk	Data Structures and Algorithms, Search on Skip Lists, Probabilistic Analysis of Skip ip Lists				
03	Trees:		9	10		

Syllabus for M. Tech in Data Science (Effective from 2021-22 Admission Session)

	Binary Search Trees, AVL Trees, Red Black Trees, 2-3 Trees, B-		
	Trees, Splay Trees		
04	Text Processing:	12	20
	Sting Operations, Brute-Force Pattern Matching, The Boyer-		
	Moore Algorithm, The Knuth-Morris-Pratt Algorithm, Standard		
	Tries, Compressed Tries, Suffix Tries, The Huffman Coding		
	Algorithm, The Longest CommonSubsequence Problem (LCS),		
	Applying Dynamic Programming to the LCS Problem.		
05	Computational Geometry:	10	15
	One Dimensional Range Searching, Two Dimensional Range		
	Searching, Constructing a Priority Search Tree, Searching a		
	Priority SearchTree, Priority Range Trees, Quadtrees, k-D Trees.		
06	Recent Trends in Hashing, Trees, and various computational	5	10
	geometry methods for efficiently solving the new evolving		
	problem		
	Sub Total:	48	70
	Internal Assessment Examination & Preparation of Semester	4	30
	Examination		
	Total:	52	100

Practical:

Skills to be developed:

Intellectual skills:

- 1. Skill to analyze algorithms and to determine algorithm correctness and their time efficiency.
- 2. Knowledge of tree and searching algorithms and their implementations.
- 3. Ability to implement algorithms to perform various operations on data structures.

List of Practical: Sl. No. 1& 2 compulsory & at least three from the rest) Assignments:

Based on Theory Lecture.

	Internal Assessment Examination & Preparation of Semester	4	30
	Examination		
	Total:	50	100

Practical:

Skills to be developed:

Intellectual skills:

After completion of course, students would be able to:

- 1. Extract features that can be used for a particular machine learning approach in various applications.
- 2. To compare and contrast pros and cons of various machine learning techniques and to get an insight of when to apply a particular machine learning approach.

List of Practical:

- 1. Exercises to solve the real-world problems using the following machine learning methods:
 - Linear Regression
 - Logistic Regression
 - Multi-Class Classification
 - Neural Networks
 - Support Vector Machines
 - K-Means Clustering & PCA
- 2. Develop programs to implement Anomaly Detection & Recommendation Systems.
- 3. Implement GPU computing models to solving some of the problems mentioned in Problem $\,$

Syllabus for M. Tech in Data Science (Effective from 2021-22 Admission Session)

Examination		
Total:	52	100

Practical:

Skills to be developed:

Intellectual skills:

Students who complete this course will be able to

- 1. explain the different visualization models.
- 2. classify the basic visualization and clustering techniques.
- 3. apply these techniques to mine real-life situations.

List of Practical:

Hand on practical based on theory paper

Assignments: Based on Theory Lecture.

List of Books Text Books:

1.	Data Structure				
2.	Computer Architecture an	d Organization			
Contents					

Chapter	Name of the Topic	Hours	Marks
01	Big Data What is big data, why big data, convergence of key trends, unstructured data, industry examples of big data, web analytics, big data and marketing, fraud and big data, risk and big data, credit risk management, big data and algorithmic trading, big data and healthcare, big data in medicine, advertising and big data, big data technologies, introduction to Hadoop, open source technologies, cloud and big data, mobile business intelligence, Crowd sourcing analytics, inter and trans firewall analytics.	8	10
02	Introduction to NoSQL Introduction to NoSQL, aggregate data models, aggregates, key- value and document data models, relationships, graph databases, schemaless databases, materialized views, distribution models, sharding, master-slave replication, peer- peer replication,	8	10
	sharding and replication, consistency, relaxing consistency, version stamps, map-reduce, partitioning and combining, composing map-reduce calculations.		
03	Data format, analysing data with Hadoop Data format, analyzing data with Hadoop, scaling out, Hadoop streaming, Hadoop pipes, design of Hadoop distributed file system (HDFS), HDFS concepts, Java interface, data flow, Hadoop I/O, data integrity, compression, serialization, Avro, file-based data structures	9	15
04	MapReduce and YARN MapReduce workflows, unit tests with MRUnit, test data and local tests, anatomy of MapReduce job run, classic Map-reduce, YARN, failures in classic Map- reduce and YARN, job scheduling, shuffle and sort, task execution, MapReduce types, input formats, output formats	10	15
05	Hbase Hbase, data model and implementations, Hbase clients, Hbase examples, praxis. Cassandra, Cassandra data model, Cassandra examples, Cassandra clients, Hadoop integration.	7	10
06	Pig Pig, Grunt, pig data model, Pig Latin, developing and testing Pig Latin scripts. Hive, data types and file formats, HiveQL data definition, HiveQL data manipulation, HiveQL queries.	6	10
	Sub Total:	48	70
	Internal Assessment Examination & Preparation of Semester Examination	4	30
	Total:	52	100

Syllabus for M. Tech in Data Science (Effective from 2021-22 Admission Session)

Practical:

Skills to be developed:

Intellectual skills:

- 1. The HDFS file system, MapReduce frameworks are studied in detail.
- 2. Hadoop tools like Hive, and Hbase, which provide interface to relational databases, are also covered as part of this course work.
- 3. Ability to implement algorithms to perform various operations on Mapreduce, Pig, Hive

List of Practical:

- 1. Basic Linux command
- 2. Installation of Hadoop.
- 3. Create a directory in HDFS at given path(s).
- 4. Copy a file from/To Local file system to HDFS
- 5. Remove a file or directory in HDFS.
- 6. Display the aggregate length of a file.
- 7. Word Count Map Reduce program to understand Map Reduce Paradigm
- 8. Implementing Matrix Multiplication with Hadoop Map Reduce
- 9. Pig Latin scripts to sort, group, join, project, and filter your data.
- 10. Hive Databases, Tables, Views, Functions and Indexes

Assignments: Based on Theory Lecture.

		Practical Sessional external examination:	60		
Aim:					
Sl. No.					
1.	1 To Present the work in International/ National conference or reputed journals.				
Objective	e:				
Sl. No.					
1.	Build ability to synthesize	knowledge and skills previously gained an	d applied to an in-		
	depth study and execution of new technical problem.				
2.	2 To select from different methodologies, methods and forms of analysis to produce a				
	suitable research design, and justify their design.				
3.	To present the findings of their technical solution in a written report.				
4.	To synthesize knowledge and skills previously gained and applied to an in-depth study				
	and execution of new technical problem.				
Contents			20 Hrs./week		

The dissertation / project topic should be selected / chosen to ensure the satisfaction of the urgent need to establish a direct link between education, national development and productivity and thus reduce the gap between the world of work and the world of study. The dissertation should have the following

- · Relevance to social needs of society
- · Relevance to value addition to existing facilities in the

institute · Relevance to industry need

- · Problems of national importance
- · Research and development in various

domain The student should complete the

following:

· Literature survey Problem

Definition · Motivation for study

and Objectives

- · Preliminary design / feasibility / modular approaches · Implementation and Verification
- · Report and presentation

The dissertation stage II is based on a report prepared by the students on dissertation allotted to them. It may be based on:

- · Experimental verification / Proof of concept.
- · Design, fabrication, testing of Communication System.
- The viva-voce examination will be based on the above report and work.

Guidelines for Dissertation Phase II

- · As per the AICTE directives, the dissertation is a yearlong activity, to be carried out and evaluated in two phases i.e. Phase I: July to December and Phase II: January to June.
- The dissertation may be carried out preferably in-house i.e. department's laboratories and centers OR in industry allotted through department's T & P coordinator.
- · After multiple interactions with guide and based on comprehensive literature survey, the student shall identify the domain and define dissertation objectives. The referred literature should preferably include IEEE/IET/IETE/Springer/Science Direct/ACM journals in the areas of Computing and Processing (Hardware and Software), Circuits-Devices and Systems, Communication-Networking and Security, Robotics and Control Systems, Signal Processing and Analysis and any other related domain. In case of Industry sponsored projects, the relevant application notes, while papers, product catalogues should be referred and reported.
- Student is expected to detail out specifications, methodology, resources required, critical issues involved in design and implementation and phase wise work distribution, and submit the proposal within a month from the date of registration.
- Phase I deliverables: A document report comprising of summary of literature survey, detailed objectives, project specifications, paper and/or computer aided design, proof of concept/functionality, part results, A record of continuous progress.
- · Phase I evaluation: A committee comprising of guides of respective specialization shall assess the progress/performance of the student based on report, presentation and Q & A. In case of unsatisfactory performance, committee may recommend repeating the Phase-I work.
- · During phase II, student is expected to exert on design, development and testing of the proposed work as per the schedule. Accomplished results/contributions/innovations should be published in terms of research papers in reputed journals and reviewed focused conferences OR IP/Patents.
- · Phase II deliverables: A dissertation report as per the specified format, developed system in the form of hardware and/or software, A record of continuous progress.
- · Phase II evaluation: Guide along with appointed external examiner shall assess the progress/performance of the student based on report, presentation and Q & A.

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY, WEST BENGAL Syllabus for M. Tech in Data Science

(Effective from 2021-22 Admission Session)

In case of unsatisfactory performance, committee may recommend for extension or repeating the work
