140 Credit (3-Year UG) MAKAUT

CC8: Microbiology

Code- BML 401

Credits- 4L+2P

Course Objective: This course prepares the students with handling of instruments and sterilization techniques. Students shall be able to identify and differentiate bacteria and fungus in biological samples

Sl	Course Outcome
1	Build the basic knowledge of microbiology.
2	Define the different equipment used in microbiology Lab.
3	Understand the mode of infection and safety measure taken in microbiology laboratory.
4	Explain the terminology used in host pathogen interaction.
5	Demonstrate the activities conducted in diagnostic microbiology.
6	Remember the character of different microorganism.
7	Utilize the knowledge and skill in diagnostic laboratory to perform different tests related to haematology.

THEORY- BML (T) 401

CO	Blooms Level	Module	%age of questions
CO1	1,2	M1	18
CO2	1,2	M2	15
CO3	1,2	M3	15
CO4	1,2	M4	12
CO5	1,2	M5	18
CO6	1,2	M6	22
			100

PRACTICAL- BML 491

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY, WB
Syllabus of B. Sc. In Medical Lab Technology
(Effective for 2021-2022 Admission Session)
Choice Based Credit System
140 Credit (3-Year UG) MAKAUT

CO	Blooms Level	Module	%age of questions
CO7	2,3	M7	100

Module 1 9 h

Contributions of Anton von Leeuwenhoek, Louis Pasteur, Robert Koch, Joseph Lister, Alexander Fleming, Edward Jenner. Introduction to bacterial taxonomy, Classification of Bacteria based on size, shape, arrangement, motility, flagella, spores, capsules, composition and detailed structure of Gram-positive and Gram-negative cell walls, plasma membrane, pili.

Module 2 7h

Basic knowledge of different types of microscope. Principle, working and use of Laminar air flow, biosafety cabinet, Centrifuge, Autoclave, hot air Oven, Incubator, Muffle Furnace, Mac-intos Field-jar etc.

Module 3 8 h General safety measures used in Microbiology laboratory, Sterilization and disinfection: Various physical methods of sterilization – heat, UV radiation, ionizing radiation, filtration. Antiseptics & Disinfectants: Definition, types and properties, mode of action and use, Occurrence of lab infections, route of infections in laboratory.

Module 4 5 h

Host pathogen interaction: Definitions - Infection, Invasion, Pathogen, Pathogenicity, Virulence, Toxigenicity, Carriers and their types, Opportunistic infections, Nosocomial infections. Transmission of infection.

Module 5 9h

Specimen collection from patients, Culture medium used in microbiology, Preparation and standardization of inoculums, Antibiotic susceptibility testing in bacteriology, choice of antibiotics MIC and MBC: Concepts and methods for determination various methods of Antibiotic susceptibility testing with special reference to Stokes and Kirby-Bauer method.

Module 6 12 h

Description, morphology, cultural characteristics, pathogenicity, clinical features and lab diagnosis of Staphylococcus, Streptococcus, Pneumococcus, Neisseria, Mycobacterium, Clostridia, Escherichia coli, Salmonella, Shigella, Proteus, Vibrio, Pseudomonas, Spirocheates, Yersenia.

Introduction of Mycology: Definition, general properties and classification Cutaneous mycoses, Systemic mycoses, Opportunistic mycoses. Culture and laboratory test for fungus.

Module 7- Practical: 26 h

1. Demonstration of Microscope and its parts.
2. Demonstration of glassware used in microbiology.
3. Demonstration of autoclave and sterilization of glass wares and of media
4. Demonstration of Hot air oven and sterilization of glass wares.
5. Demonstration of Laminar airflow, biosafety cabinet and media preparation
6. Demonstration of Centrifuge.
7. Demonstration of Incubator and preservation of cultures.
8. Preparation of media.

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY, WB
Syllabus of B. Sc. In Medical Lab Technology
(Effective for 2021-2022 Admission Session)
Choice Based Credit System
140 Credit (3-Year UG) MAKAUT

9. Preparation of culture plates
10. To perform Gram staining.
11. To perform Indian ink staining.
12. To perform Acid fast staining (Zeihl Neelsen staining).
13. To perform Hanging drop method
14. Antibiotic sensitivity test.
15. Examination of urine.
16. Examination of sputum

Suggested Readings

1. Ananthanarayan R. and Paniker C.K.J. (2009) Textbook of Microbiology, 8th edition, University Press Publication.
2. Brooks G.F., Carroll K.C., Butel J.S., Morse S.A. and Mietzner, T.A. (2013).
3. Adelberg's Medical Microbiology. 26th edition. McGraw Hill Publication
4. Goering R., Dockrell H., Zuckerman M. and Wakelin D. (2007) Mims' Medical Microbiology. 4th edition. Elsevier.
5. Willey JM, Sherwood LM, and Woolverton CJ. (2013) Prescott, Harley and Klein's Microbiology. 9th edition. McGraw Hill Higher Education.

CC 9: Haematology II

Code- BML 402

Credits- 4L+2P

Course Objective: Students will be able to perform the differential diagnosis and appropriate diagnostic evaluation of common hematologic abnormalities.

Sl	Course Outcome
1	Understand the basic principle related to coagulation study and general blood picture.
2	Explain the pathogenesis, clinical features and lab investigations of aplastic and sideroblastic anaemia.
3	Demonstrate the pathogenesis, clinical features and lab investigations of sickle cell anaemia and thalassemia.
4	Built knowledge about the aetiology, classification, clinical features and laboratory investigations of Leukemia.
5	Able to illustrate the disorder related to blood coagulation, special attention to coagulation factor deficiency.

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY, WB
Syllabus of B. Sc. In Medical Lab Technology
(Effective for 2021-2022 Admission Session)
Choice Based Credit System
140 Credit (3-Year UG) MAKAUT

6	Apply the knowledge and skill in diagnostic laboratory to perform different tests related to haematology.
---	---

THEORY- BML (T) 402

CO	Blooms Level	Module	%age of questions
CO1	1,2	M1	20
CO2	1,2	M2	18
CO3	1,2	M3	20
CO4	1,2	M4	20
CO5	1,2	M5	22
			100

PRACTICAL- BML 492

CO	Blooms Level	Module	%age of questions
CO6	2,3	M6	100

Module 1 10 h

General blood picture estimation of iron, TIBC, Transferrin, Ferritin, Plasma haemoglobin, Vit.B12, Folic acid, Heinz bodies, Platelet count, Platelet aggregation test, PT, INR, APTT, Thrombin time. Role of coagulation factors.

Module 2 9 h

Aplastic anaemia, Anaemia of chronic disorders, Sideroblastic anaemia: aetiology, pathogenesis, clinical features, laboratory investigations. Bone marrow examination, composition & functions, aspiration techniques, processing and staining.

Module 3 10h

Sickle cell anaemia, sickle cell trait, aetiology, pathogenesis, clinical features, and laboratory investigations, Sickling test, Thalassaemia, classification, aetiology, pathogenesis, clinical features, laboratory Investigations.

Module 4 10 h

Leukemia and its classification, WHO and FAB classification, AML, ALL, CML, CLL, its aetiology, clinical features, laboratory investigations. Cytochemistry involved in diagnosis of various types of leukemia.

Module 5 11 h

Qualitative and quantitative disorders of platelets, disorders of secondary hemostasis, hemophilia and its lab diagnosis, Von- Willebrand disease, Disseminated intravascular coagulation, thrombosis, Disorder of fibrinogen, test for bleeding & coagulation disorders, correction studies for factor deficiency, quantitative factor assay, LE cells, its demonstration and significance.

Module 6- Practical: 26h

1. To perform sickling test.
2. To perform Heinz bodies.

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY, WB

(Effective for 2021-2022 Admission Session)
Choice Based Credit System
140 Credit (3-Year UG) MAKAUT

3. To perform LAP scoring.
4. To determine total platelet count.
5. To perform PT.
6. To perform APTT.
7. To perform thrombin time.
8. To perform D-dimer test.
9. To determine fibrinogen conc.
10. Haemoglobin electrophoresis.

CC 10: Immunology

Code- BML 403

Credits- 4L+2P

Course Objective: Prepare the students with the basic knowledge of immune system, its functions and its related disease. Students will able to carry out differential diagnosis of immune disease by the help of serological techniques.

Sl	Course Outcome
1	Illustrate the basic concept of immune cells, immune organs, antigens, haptens and immunogens.
2	Demonstrate different types of antibody and its structures and immune response.
3	Explain about the histocompatibility complex and its role in transplantation immunology.
4	Acquire knowledge on immunological disorder and its related diseases.
5	Understand about the immunization and its functions to protect from immune disease.
6	Apply the knowledge and skill in diagnostic laboratory to perform serological tests.

THEORY- BML (T) 403

CO	Blooms Level	Module	%age of questions
CO1	1,2	M1	17
CO2	1,2	M2	20
CO3	1,2	M3	21
CO4	1,2	M4	30
CO5	1,2	M5	12
			100

PRACTICAL- BML 493

CO	Blooms Level	Module	%age of questions
CO6	2,3	M6	100

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY, WB
Syllabus of B. Sc. In Medical Lab Technology
(Effective for 2021-2022 Admission Session)
Choice Based Credit System
140 Credit (3-Year UG) MAKAUT

Module 1- 8h

Historical background, general concepts of the immune system, innate and adaptive immunity, Cell and organs of immune system, Phagocytosis. Antigens, Immunogen, haptens: Properties, foreignness, molecular size, heterogeneity, B and T cell epitopes, T dependent and T independent antigens.

Module 2- 11h

Antibodies: Historical perspective of antibody structure; structure, function and properties of the antibodies; different classes, subclasses and biological activities of antibodies; isotype, allotype, monoclonal antibodies and polyclonal antibody, active and passive immunity; primary and secondary immune response.

Laboratory tests for demonstration of antigen – antibody reaction such as agglutination, precipitation.

Module 3- 11 h

Introduction of Major Histocompatibility Complex, organization of MHC and inheritance in humans; Antigen presenting cells, antigen processing and presentation. Mechanism of humoral and cell mediated immune response.

Introduction of transplant immunology, graft rejection, tissue typing for transplant, Laboratory test for transplant.

Module 4- 14h

Hypersensitivity and its types Introduction to Allergy and its laboratory test.

Autoimmune disorders, pathogenesis, organ specific and systemic autoimmune disorders and its markers such as parietal cell antibody, anti sperm antibody, lupus anticoagulants, HLA-B27, anti CCP

Immunological disorders: primary and secondary immunodeficiency, SCID, AIDS, Tumour, types of tumours, Various Tumour Markers, their significance and method of estimation.

Module 5- 6h

Vaccines, classification and applications, Active and passive immunization, Immunoprophylaxis schedule in neonates, children and in pregnancy.

Module 6- Practical: 26h

1. To demonstrate agglutination reaction.
2. To perform RA test.
3. To perform WIDAL test.
4. To perform CRP test.
5. To perform HIV Tridot test.
6. To perform HBsAg rapid test.
7. To perform ASO test.
8. To perform TB IgG & IgM test.
9. To perform Dengue IgG & IgM test.
10. To perform RPR test.
11. Montoux test

SEC 2: Histotechnique

Code- BML 455

Credits- 1L+1T

Course Objective: Students would be able to carry out tissue processing and general staining.

Sl	Course Outcome
1	Understand the basic knowledge of histotechnique.
2	Demonstrate the tissue processing and microtome and its use
3	Able to explain the process of frozen tissue section in emergency and routine tissue staining.

CO	Blooms Level	Module	%age of questions
CO1	1,2	M1	24
CO2	1,2	M2	38
CO3	1,2	M3	38
			100

Module 1: 8h

Introduction of histopathology, cytology & histotechniques, care & maintenance of equipments used in histotechnology lab, safety measures in histotechnology lab. Recording, Labelling and transportation of tissue specimens, Basic concepts of fixation and various types of fixative used in histopathology and cytopathology.

Module 2: 10 h

Tissue and its types, Location and function, Grossing of tissues, sections, smears, tissue processing and its steps, manual and automated method. Decalcification, decalcification methods, types of decalcifying fluid, Processing of bones and teeth, Embedding media, its type and properties. Microtome, its type, Microtome knives, its type and knife sharpening, Section cutting, fault and remedies.

Module 3: 10 h

Cryostat, frozen sections of fresh, fixed and unfixed tissue, freeze drying, rapid frozen sections and staining for emergency diagnosis Dye chemistry, Stains and dyes, natural dye, acidic dye, basic dye, neutral dyes,
