<b>Name of the Course: B.Sc. in Information Technology (Cyber Security)</b>	
<b>Subject: Programming Fundamental</b>	
<b>Course Code:</b> BITCSC101 BITCSC191	<b>Semester: I</b>
<b>Duration: 36 Hrs.</b>	<b>Maximum Marks: 100+100</b>
<b>Teaching Scheme</b>	<b>Examination Scheme</b>
<b>Theory: 4</b>	<b>End Semester Exam: 70</b>
<b>Tutorial: 0</b>	<b>Attendance : 5</b>
<b>Practical: 4</b>	<b>Continuous Assessment: 25</b>
<b>Credit: 4 + 2</b>	<b>Practical Sessional internal continuous evaluation: 40</b>
	<b>Practical Sessional external examination: 60</b>
<b>Aim:</b>	
<b>Sl. No.</b>	
1.	Implement your algorithms to build programs in the C programming language
2.	Use data structures like arrays, linked lists, and stacks to solve various problems
3.	Understand and use file handling in the C programming language
<b>Objective:</b>	
<b>Sl. No.</b>	
1.	To write efficient algorithms to solve various problems
2.	To understand and use various constructs of the programming language
3.	To apply such as conditionals, iteration, and recursion in programming
<b>Pre-Requisite:</b>	
<b>Sl. No.</b>	
1.	Basic Knowledge of Computer System
<b>Contents</b>	<b>4 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>
	<b>Hours</b>
	<b>Marks</b>

01	<b>Introduction to Computers</b> Computer Systems, Computing Environments, Computer Languages, Creating and Running Programs, Software Development, Flow charts. Number Systems: Binary, Octal, Decimal, Hexadecimal Introduction to C Language - Background, C Programs, Identifiers, Data Types, Variables, Constants, Input / Output Statements Arithmetic Operators and Expressions: Evaluating Expressions, Precedence and Associativity of Operators, Type Conversions.	6	10
02	<b>Conditional Control Statements</b> Bitwise Operators, Relational and Logical Operators, If, If- Else, Switch-Statement and Examples. Loop Control Statements: For, While, DoWhile and Examples. Continue, Break and Goto statements Functions: Function Basics, User-defined Functions, Inter Function Communication, Standard Functions, Methods of Parameter Passing. Recursion- Recursive Functions.. Storage Classes: Auto, Register, Static, Extern, Scope Rules, and Type Qualifiers.	8	10
03	<b>Pre-processors and Arrays</b> Pre-processor Commands Arrays - Concepts, Using Arrays in C, Inter-Function Communication, Array Applications, Two- Dimensional Arrays, Multidimensional Arrays, Linear and Binary Search, Selection and Bubble Sort.	8	16
04	<b>Pointers</b> Pointers for Inter-Function Communication, Pointers to Pointers, Compatibility, Lvalue and Rvalue, Arrays and Pointers, Pointer Arithmetic and Arrays, Passing an Array to a Function, Memory Allocation Functions, Array of Pointers, Programming Applications, Pointers to void, Pointers to Functions, Command Line Arguments. Strings - Concepts, C Strings, String Input/ Output Functions, Arrays of Strings, String Manipulation Functions.	8	16
05	<b>Structures and File</b> Definition and Initialization of Structures, Accessing Structures, Nested Structures, Arrays of Structures, Structures and Functions, Pointers to Structures, Self-Referential Structures, Unions, Type Definition (typedef), Enumerated Types. Input and Output: Introduction to Files, Modes of Files, Streams, Standard Library Input/ Output Functions, Character Input/ Output Functions.	6	18
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	<b>4</b>	<b>30</b>
	<b>Total:</b>	<b>40</b>	<b>100</b>

**Practical:**

**Skills to be developed:**

Intellectual skills:

1. The ability to learn concepts and apply them to other problems. ...

2. Basic mathematical skills.
3. A passion for problem solving.
4. Confidence around a computer programming Language.

**List of Practical: Sl. No. 1 to 10 compulsory & at least three from the rest)**

1. Write a c program to display the word "welcome".
2. Write a c program to take a variable int and input the value from the user and displayit.
3. Write a c program to add 2 numbers entered by the user and display theresult.
4. Write a c program to calculate the area and perimeter of a circle.
5. Write a C program to find maximum between two numbers.
6. Write a C program to check whether a number is divisible by 5 and 11 ornot.
7. Write a C program to input angles of a triangle and check whether triangle is valid ornot.
8. Write a C program to check whether a year is leap year ornot.
9. Write a C program to input basic salary of an employee and calculate its Gross salary according to following:
  - Basic Salary <= 10000 : HRA = 20%, DA = 80%
  - Basic Salary <= 20000 : HRA = 25%, DA = 90%
  - Basic Salary > 20000 : HRA = 30%, DA = 95%
10. Write a c program to print "welcome" 10 times.
11. Write a c program to print first n natural numbers using while loop.
12. Write a c program to print all the odd numbers in a given range.
13. Write a c program to add first n numbers using while loop.
14. Write a c program to print all numbers divisible by 3 or 5 in a givenrange.
15. Write a c program to add even numbers in a givenrange.
16. Write a c program to find the factorial of a givennumber.
17. Write a c program to find whether a number is prime or not.
18. Write a c program to print the reverse of a number.
19. Write a c program to add the digits of a number.
20. Write a c program to print the Fibonacci series in a given range using recursion.
21. Write a c program to check whether a number is an Armstrong number or not.
22. Write a c program to find g.c.d. and l.c.m. of two numbers using function.

**Assignments:**

1. Based on theory lectures.

**List of Books**

**Aim:**

**Sl. No.**

- |    |  |
|----|--|
| 1. | The aim of this course is to introduce you with a new branch of mathematics which is discrete mathematics, the backbone of Computer Science. |
| 2. | In order to be able to formulate what a computer system is supposed to do, or to prove that  |

	it does meet its specification, or to reason about its efficiency, one needs the precision of mathematical notation and techniques. The Discrete Mathematics course aims to provide this mathematical background.		
<b>Objective:</b> Throughout the course, students will be expected to demonstrate their understanding of Discrete Mathematics by being able to do each of the following			
<b>Sl. No.</b>			
1.	Use mathematically correct terminology and notation.		
2.	Construct correct direct and indirect proofs.		
3.	Use division into cases in a proof.		
4.	Use counterexamples.		
5.	Apply logical reasoning to solve a variety of problems.		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	<b>Knowledge of basic algebra</b>		
2.	<b>Ability to follow logical arguments.</b>		
<b>Contents</b>		<b>4 Hrs./week</b>	
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Set Theory</b> Definition of Sets, Venn Diagrams, complements, Cartesian products, power sets, counting principle, cardinality and countability (Countable and Uncountable sets), proofs of some general identities on sets, pigeonhole principle. Relation: Definition, types of relation, composition of relations, domain and range of a relation, pictorial representation of relation, properties of relation, partial ordering relation. Function: Definition and types of function, composition of functions, recursively defined functions.	<b>7</b>	<b>14</b>
02	<b>Propositional logic</b> Proposition logic, basic logic, logical connectives, truth tables, tautologies, contradictions, normal forms (conjunctive and disjunctive), modus ponens and modus tollens, validity, predicate logic, universal and existential quantification. Notion of proof: proof by implication, converse, inverse, contrapositive, negation, and contradiction, direct proof, proof by using truth table, proof by counter example.	<b>8</b>	<b>14</b>
03	<b>Combinatorics</b> Mathematical induction, recursive mathematical definitions, basics of counting, permutations, combinations, inclusion-exclusion, recurrence relations (nth order recurrence relation with constant coefficients, Homogeneous recurrence relations, Inhomogeneous recurrence relation), generating function (closed form expression, properties of G.F., solution of recurrence relation using G.F, solution of combinatorial problem using G.F.)	<b>7</b>	<b>14</b>
04	<b>Algebraic Structure</b> Binary composition and its properties definition of	<b>6</b>	<b>10</b>

	algebraic structure, Groyas Semi group, Monoid Groups, Abelian Group, properties of groups, Permutation Groups, Sub Group, Cyclic Group, Rings and Fields (definition and standard results).		
05	<b>Graphs</b> Graph terminology, types of graph connected graphs, components of graph, Euler graph, Hamiltonian path and circuits, Graph coloring, Chromatic number. Tree: Definition, types of tree(rooted, binary), properties of trees, binary search tree, tree traversing (preorder, inorder, post order). Finite Automata: Basic concepts of Automation theory, Deterministic finite Automation (DFA), transition function, transition table, Non Deterministic Finite Automata (N DFA), Mealy and Moore Machine, Minimization of finite Automation.	8	18
	<b>Sub Total:</b>	36	70
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	4	30
	<b>Total:</b>	40	100

**Assignments:**

Based on the curriculum as covered by subject teacher.

<b>Credit: 2</b>		<b>Practical Sessional internal continuous evaluation: NA</b>	
		<b>Practical Sessional external examination: NA</b>	
<b>Aim:</b>			
<b>Sl. No.</b>			
1.	Ability to read English with ability to read English with understanding and decipher paragraph patterns, writer techniques and conclusions		
2.	Skill to develop the ability to write English correctly and master the mechanics of writing the use of correct punctuation marks and capital letter		
3.	Ability to understand English when it is spoken in various contexts.		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	To enable the learner to communicate effectively and appropriately in real life situation		
2.	To use English effectively for study purpose across the curriculum		
3.	To use R,W,L,S and integrate the use of four language skills, Reading, writing , listening and speaking.		
4.	To revise and reinforce structures already learnt.		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Basic knowledge of English Language.		
<b>Contents</b>			<b>2 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Grammar</b> Correction of sentence, Vocabulary/word formation, Single word for a group of words, Fill in the blank, transformation of sentences,	6	15

	Structure of sentences – Active / Passive Voice – Direct / Indirect Narration.		
02	<b>Essay Writing</b> Descriptive – Comparative – Argumentative – Thesis statement- Structure of opening / concluding paragraphs – Body of the essay.	5	5
03	<b>Reading Comprehension</b> Global – Contextual – Inferential – Select passages from recommended text.	5	10
04	<b>Business Correspondence</b> Letter Writing – Formal. Drafting. Bio data - Resume'- Curriculum Vitae.	5	8
05	<b>Report Writing</b> Structure, Types of report – Practice Writing.	5	5
06	<b>Communication skills</b> Public Speaking skills, Features of effective speech, verbal-nonverbal.	5	15
07	<b>Group discussion</b> Group discussion – principle – practice	5	12
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	<b>4</b>	<b>30</b>
	<b>Total:</b>	<b>40</b>	<b>100</b>

**Practical:**

**Skills to be developed:**

Intellectual skills:

1. Skill of Grammar
2. Various writing skills
3. Skill of reading English text
4. Skill of effective written communication

Motor Skills:

1. Skill of using Correct body language while giving a presentation
2. Various non-verbal communication skills
3. Skill of using correct gestures and expressions while speaking publicly
4. Essential approach and attitude in Group Discussion or Viva

**List of Practical:**

1. Honing 'Listening Skill' and its sub skills through Language Lab Audio device.
2. Honing 'Speaking Skill' and its sub skills.
3. Helping those master Linguistic/Paralinguistic features (Pronunciation/Phonetics/Voice modulation / Stress / Intonation / Pitch & Accent) of connected speech.
4. Honing 'Conversation Skill' using Language Lab Audio –Visual input, Conversational Practice Sessions (Face to Face / via Telephone, Mobile phone & Role Play Mode).
5. Introducing 'Group Discussion' through audio –Visual input and acquainting them with key strategies for success.
6. GD Practice Sessions for helping them internalize basic Principles (turn- taking, creative intervention, by using correct body language, courtesies & other soft skills) of GD.
7. Honing 'Reading Skills' and its sub skills using Visual / Graphics/Diagrams /Chart Display/Technical/Non-Technical Passages, Learning Global / Contextual / Inferential Comprehension.
8. Honing 'Writing Skill' and its sub skills by using Language Lab Audio –Visual input, Practice Sessions

**Assignments:**

Based on theory lectures.

Practical Sessional external examination: 60

<b>Aim:</b>			
<b>Sl. No.</b>			
1.	The point of this course is to give you a vibe for algorithms and data structures as a focal area of what it is to be a computer science student.		
2.	You ought to know about the way that there are regularly a few calculations for some issue, and one calculation might be superior to another, or one calculation better in certain conditions and another better in others.		
3.	You should have some idea of how to work out the efficiency of an algorithm.		
4.	You will be able to use and design linked data structures		
5.	You will learn why it is good programming style to hide the details of a data structure within an abstract data type.		
6.	You should have some idea of how to implement various algorithm using python programming.		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	To impart the basic concepts of data structures and algorithms.		
2.	To understand concepts about searching and sorting techniques.		
3.	To understand basic concepts about stacks, queues, lists, trees and graphs.		
4.	To understanding about writing algorithms and step by step approach in solving problems with the help of fundamental data structures		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Basics of programming language.		
1.	Logic building skills.		
<b>Contents</b>			<b>3 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Introduction to Data Structure</b> Abstract Data Type.	1	2
02	<b>Arrays</b> 1D, 2D and Multi-dimensional Arrays, Sparse Matrices. Polynomial representation.	3	4
03	<b>Linked Lists</b> Singly, Doubly and Circular Lists, Normal and Circular representation of Self Organizing Lists, Skip Lists, Polynomial representation.	4	7
04	<b>Stacks</b> Implementing single / multiple stack/s in an Array, Prefix, Infix and Postfix expressions, Utility and conversion of these expressions from one to another, Applications of stack, Limitations of Array representation of stack.	4	10
05	<b>Queues</b> Array and Linked representation of Queue, Circular Queue, De-	4	7

	queue, Priority Queues.		
06	<b>Recursion</b> Developing Recursive Definition of Simple Problems and their implementation, Advantages and Limitations of Recursion, Understanding what goes behind Recursion (Internal Stack Implementation)	4	5
07	<b>Trees</b> Introduction to Tree as a data structure, Binary Trees (Insertion, Deletion, Recursive and Iterative Traversals of Binary Search Trees), Threaded Binary Trees (Insertion, Deletion, Traversals), Height-Balanced Trees (Various operations on AVL Trees).	5	15
08	<b>Searching and Sorting</b> Linear Search, Binary Search, Comparison of Linear and Binary Search, Selection Sort, Insertion Sort, Merge Sort, Quick sort, Shell Sort, Comparison of Sorting Techniques	6	15
09	<b>Hashing</b> Introduction to Hashing, Deleting from Hash Table, Efficiency of Rehash Methods, Hash Table Reordering, Resolving collision by Open Addressing, Coalesced Hashing, Separate Chaining, Dynamic and Extendible Hashing, Choosing a Hash Function, Perfect Hashing Function.	5	5
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	<b>4</b>	<b>30</b>
	<b>Total:</b>	<b>40</b>	<b>100</b>

**Practical:**

**Skills to be developed:**

Intellectual skills:

1. Skill to analyze algorithms and to determine algorithm correctness and their time efficiency.
2. Knowledge of advanced abstract data type (ADT) and data structures and their implementations.
3. Ability to implement algorithms to perform various operations on data structures.

**List of Practical:**

1. Implementation of array operations.
2. Stacks and Queues: adding, deleting elements.
3. Circular Queue: Adding & deleting elements
4. Merging Problem : Evaluation of expressions operations on Multiple stacks & queues
5. Implementation of linked lists: inserting, deleting, and inverting a linked list.
6. Implementation of stacks & queues using linked lists:
7. Polynomial addition, Polynomial multiplication
8. Sparse Matrices: Multiplication, addition.
9. Recursive and Non Recursive traversal of Trees Threaded binary tree traversal. AVL tree implementation Application of Trees.

10. Application of sorting and searching algorithms Hash tables' implementation: searching, inserting and deleting, searching & sorting techniques.

**Assignments:**

Based on the curriculum as covered by subject teacher.

**List of Books**

**Text Books:**

Name of Author	Title of the Book	Edition/ISSN/ISBN	Name of the Publisher

<b>Aim:</b>	
<b>Sl. No.</b>	
1.	General understanding of structure of modern computers
2.	Purpose, structure and functions of operating systems
3.	Illustration of key OS aspects by example
<b>Objective:</b>	
<b>Sl. No.</b>	
1.	To learn the fundamentals of Operating Systems.
2.	To learn the mechanisms of OS to handle processes and threads and their communication
3.	To learn the mechanisms involved in memory management in contemporary OS
4.	To gain knowledge on distributed operating system concepts that includes architecture, Mutual exclusion algorithms, deadlock detection algorithms and agreement protocols
5.	To know the components and management aspects of concurrency management
6.	To learn programmatically to implement simple OS mechanisms
<b>Pre-Requisite:</b>	
<b>Sl. No.</b>	
1.	Strong programming skills (Knowledge of C)

2.	Computer architecture		
3.	Elementary data structures and algorithms		
<b>Contents</b>		<b>4 Hrs./week</b>	
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<p><b>Introduction</b> Concept of Operating Systems, Generations of Operating systems, Types of Operating Systems, OS Services, System Calls, Structure of an OS - Layered, Monolithic, Microkernel Operating Systems, Concept of Virtual Machine. Case study on UNIX and WINDOWS Operating System.</p>	3	5
02	<p><b>Processes</b> Definition, Process Relationship, Different states of a Process, Process State transitions, Process Control Block (PCB), Context switching Thread: Definition, Various states, Benefits of threads, Types of threads, Concept of multithreads, Process Scheduling: Foundation and Scheduling objectives, Types of Schedulers, Scheduling criteria: CPU utilization, Throughput, Turnaround Time, Waiting Time, Response Time; Scheduling algorithms: Pre-emptive and Non pre-emptive, FCFS, SJF, RR; Multiprocessor scheduling: Real Time scheduling: RM and EDF.</p>	8	20
03	<p><b>Inter-process Communication:</b> Critical Section, Race Conditions, Mutual Exclusion, Hardware Solution, Strict Alternation, Peterson's Solution, The Producer\ Consumer Problem, Semaphores, Event Counters, Monitors, Message Passing, Classical IPC Problems: Reader's &amp; Writer Problem, Dining Philosopher Problem etc.</p>	4	5
04	<p><b>Deadlocks</b> Definition, Necessary and sufficient conditions for Deadlock, Deadlock Prevention, Deadlock Avoidance: Banker's algorithm, Deadlock detection and Recovery.</p>	4	10
05	<p><b>Memory Management</b> Basic concept, Logical and Physical address map, Memory allocation: Contiguous Memory allocation – Fixed and variable partition– Internal and External fragmentation and Compaction; Paging: Principle of operation – Page allocation – Hardware support for paging, Protection and sharing, Disadvantages of paging. Virtual Memory: Basics of Virtual Memory – Hardware and control structures – Locality of reference, Page fault, Working Set, Dirty page/Dirty bit – Demand paging, Page Replacement algorithms: Optimal, First in First Out (FIFO), Second Chance (SC), Not recently used (NRU) and Least Recently used (LRU).</p>	8	10

06	<b>I/O Hardware</b> I/O devices, Device controllers, Direct memory access Principles of I/O Software: Goals of Interrupt handlers, Device drivers, Device independent I/O software, Secondary-Storage Structure: Disk structure, Disk scheduling algorithms File Management: Concept of File, Access methods, File types, File operation, Directory structure, File System structure, Allocation methods (contiguous, linked, indexed), Free-space management (bit vector, linked list, grouping), directory implementation (linear list, hash table), efficiency and performance.	<b>6</b>	<b>10</b>
07	<b>Disk Management</b> Disk structure, Disk scheduling - FCFS, SSTF, SCAN, C-SCAN, Disk reliability, Disk formatting, Boot-block, Bad blocks.	<b>3</b>	<b>10</b>
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	<b>4</b>	<b>30</b>
	<b>Total:</b>	<b>40</b>	<b>100</b>
<p><b>Practical:</b></p> <p><b>Skills to be developed:</b> Intellectual skills:</p> <ol style="list-style-type: none"> <li>1. Can be able to identify the purpose of the analysis.</li> <li>2. Can be considered a reliable source of information.</li> <li>3. Can able to use a variety of techniques to extend the original idea.</li> </ol> <p><b>List of Practical: Sl. No. 1&amp; 2 compulsory &amp; at least three from the rest)</b></p> <ol style="list-style-type: none"> <li>1. Basics of UNIX commands.</li> <li>2. Shell programming</li> <li>3. Implementation of CPU scheduling. a) Round Robin b) SJF c) FCFS d) Priority</li> <li>4. Implement all file allocation strategies</li> <li>5. Implement Semaphores</li> <li>6. Implement Bankers algorithm for Dead Lock Avoidance</li> <li>7. Implement an Algorithm for Dead Lock Detection</li> <li>9. Implement the all page replacement algorithms a) FIFO b) LRU c) LFU 10. Implement Shared memory and IPC</li> <li>10. Implement Paging Technique f memory management.</li> <li>11. Implement Threading &amp; Synchronization Applications</li> </ol> <p><b>Assignments:</b> Based on the curriculum as covered by subject teacher.</p> <p><b>List of Books</b> <b>Text Books:</b></p>

<b>Aim:</b>			
<b>Sl. No.</b>			
<b>1.</b>	To enable critical thinking in relation to environmental affairs.		
<b>2.</b>	Understanding about interdisciplinary nature of environmental issues		
<b>3.</b>	Independent research regarding environmental problems in form of project report		
<b>Objective:</b>			
<b>Sl. No.</b>			
<b>1.</b>	To create awareness about environmental issues.		
<b>2.</b>	To nurture the curiosity of students particularly in relation to natural environment.		
<b>3.</b>	To develop an attitude among students to actively participate in all the activities regarding environment protection		
<b>4.</b>	To develop an attitude among students to actively participate in all the activities regarding environment protection		
<b>Contents</b>			<b>4 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Introduction</b> Basic ideas of environment, basic concepts, man, society & environment, their interrelationship. Mathematics of population growth and associated problems, Importance of population study in environmental engineering, definition of resource, types of resource, renewable, non-renewable, potentially renewable, effect of excessive use vis-à-vis population growth, Sustainable Development. Materials balance: Steady state conservation system, steady state system with non-conservative pollutants, step function. Environmental degradation: Natural environmental Hazards	<b>3</b>	<b>5</b>

	like Flood, earthquake, Landslide-causes, effects and control/management, Anthropogenic degradation like Acid rain-cause, effects and control. Nature and scope of Environmental Science and Engineering.		
02	<p><b>Ecology</b></p> <p>Elements of ecology: System, open system, closed system, definition of ecology, species, population, community, definition of ecosystem- components types and function.</p> <p>Structure and function of the following ecosystem: Forest ecosystem, Grassland ecosystem, Desert ecosystem, Aquatic ecosystems, Mangrove ecosystem (special reference to Sundarban), Food chain [definition and one example of each food chain], Food web.</p> <p>Biogeochemical Cycle- definition, significance, flow chart of different cycles with only elementary reaction [Oxygen, carbon, Nitrogen, Phosphate, Sulphur].</p> <p>Biodiversity- types, importance, Endemic species, Biodiversity Hot-spot, Threats to biodiversity, Conservation of biodiversity.</p>	7	10
03	<p><b>Air pollution and control</b></p> <p>Atmospheric Composition: Troposphere, Stratosphere, Mesosphere, Thermosphere, Tropopause and Mesopause.</p> <p>Energy balance: Conductive and Convective heat transfer, radiation heat transfer, simple global temperature model [Earth as a black body, earth as albedo], Problems. Greenhouse effects: Definition, impact of greenhouse gases on the global climate and consequently on sea water level, agriculture and marine food. Global warming and its consequence, Control of Global warming. Earth's heat budget. Lapse rate: Ambient lapse rate Adiabatic lapse rate, atmospheric stability, temperature inversion (radiation inversion). Atmospheric dispersion: Maximum mixing depth, ventilation coefficient, effective stack height, smokestack plumes and Gaussian plume model. Definition of pollutants and contaminants, Primary and secondary pollutants: emission standard, criteria pollutant. Sources and effect of different air pollutants- Suspended particulate matter, oxides of carbon, oxides of nitrogen, oxides of sulphur, particulate, PAN. Smog, Photochemical smog and London smog. Depletion Ozone layer: CFC, destruction of ozone layer by CFC, impact of other greenhouse gases, effect of ozone modification. Standards and control measures: Industrial, commercial and residential air quality standard, control measure (ESP, cyclone separator, bag house, catalytic converter, scrubber (ventury), Statement with brief reference).</p>	6	10
04	<p><b>Water Pollution and Control</b></p> <p>Hydrosphere, Hydrological cycle and Natural water. Pollutants of water, their origin and effects: Oxygen demanding wastes,</p>	6	15

	pathogens, nutrients, Salts, thermal application, heavy metals, pesticides, volatile organic compounds. River/Lake/ground water pollution: River: DO, 5 day BOD test, Seeded BOD test, BOD reaction rate constants, Effect of oxygen demanding wastes on river[deoxygenation, reaeration], COD, Oil, Greases, pH. Lake: Eutrophication [Definition, source and effect]. Ground water: Aquifers, hydraulic gradient, ground water flow (Definition only) Standard and control: Waste water standard [BOD, COD, Oil, Grease], Water Treatment system [coagulation and flocculation, sedimentation and filtration, disinfection, hardness and alkalinity, softening] Wastewater treatment system, primary and secondary treatments [Trickling filters, rotating biological contractor, Activated sludge, sludge treatment, oxidation ponds] tertiary treatment definition. Water pollution due to the toxic elements and their biochemical effects: Lead, Mercury, Cadmium, and Arsenic.		
05	<b>Land Pollution</b> Lithosphere, Internal structure of earth, rock and soil 1L Solid Waste: Municipal, industrial, commercial, agricultural, domestic, pathological and hazardous solid wastes, Recovery and disposal method- Open dumping, Land filling, incineration, composting, recycling. Solid waste management and control (hazardous and biomedical waste).	4	10
06	<b>Noise Pollution</b> Definition of noise, effect of noise pollution, noise classification [Transport noise, occupational noise, neighbourhood noise] Definition of noise frequency, noise pressure, noise intensity, noise threshold limit value, equivalent noise level,(18hr Index), Ldn. Noise pollution control.	5	5
07	<b>Environmental Management</b> Environmental impact assessment, Environmental Audit, Environmental laws and protection act of India, Different international environmental treaty/ agreement/ protocol.	5	5
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	<b>4</b>	<b>30</b>

<b>Total Credit</b>							<b>26</b>

<b>Name of the Course:</b> B.Sc. in Information Technology (Cyber Security)	
<b>Subject:</b> DBMS and SQL injection Attack and DBMS and SQL injection Attack Lab	
<b>Course Code:</b> BITCSC301 + BITCSC391	<b>Semester:</b> III
<b>Duration:</b> 36 Hrs.	<b>Maximum Marks:</b> 100 + 100
<b>Teaching Scheme</b>	<b>Examination Scheme</b>
<b>Theory:</b> 4	<b>End Semester Exam:</b> 70
<b>Tutorial:</b> 0	<b>Attendance :</b> 5
<b>Practical:</b> 4	<b>Continuous Assessment:</b> 25
<b>Credit:</b> 4 + 2	<b>Practical Sessional internal continuous evaluation:</b> 40
	<b>Practical Sessional external examination:</b> 60
<b>Aim:</b>	
<b>Sl. No.</b>	
1.	To gain knowledge of computer networks.
2.	To gain knowledge of several layers and network architectures
3.	To gain knowledge of communication through networks, protocols and algorithms.
<b>Objective:</b>	
<b>Sl. No.</b>	
1.	Understand the division of network functionalities into layers.
2.	Be familiar with the components required to build different types of networks Be exposed to the required functionality at each layer
3.	Learn the flow control and congestion control algorithms
<b>Pre-Requisite:</b>	
<b>Sl. No.</b>	
1.	Understanding of algorithms
2.	Understanding of basic computer architecture

<b>Contents</b>		<b>Hrs./week</b>

Chapter	Name of the Topic	Hours	Marks
01	<b>Database Management System Concepts</b> Introduction, Significance of Database, Database System Applications; Data Independence; Data Modeling for a Database; Entities and their Attributes, Entities, Attributes, Relationships and Relationships Types, Advantages and Disadvantages of Database Management System, DBMS Vs RDBMS	3	6
02	<b>Database System Architecture</b> Three Level Architecture of DBMS, The External Level or Subschema, The Conceptual Level or Conceptual Schema, The Internal Level or Physical Schema, Mapping; MySQL Architecture; SQL Server 2000 Architecture; Oracle Architecture; Database Management System Facilities, Data Definition Language, Data Manipulation Language; Database Management System Structure, Database Manager, Database Administrator, Data Dictionary; Distributed Processing, Information and Communications Technology System (ICT), Client / Server Architecture	3	6
03	<b>Database Models and Implementation</b> Data Model and Types of Data Model, Relational Data Model, Hierarchical Model, Network Data Model, Object/Relational Model, Object-Oriented Model; Entity-Relationship Model, Modeling using E-R Diagrams, Notation used in E-R Model, Relationships and Relationship Types; Associative Database Model	3	6
04	<b>File Organization for Conventional DBMS</b> Storage Devices and its Characteristics, Magnetic Disks, Physical Characteristics of Disks, Performance Measures of Disks, Optimization of Disk-Block Access; File Organization, Fixed-Length Records, Variable-Length Records, Organization of records in files; Sequential file Organization; Indexed Sequential Access Method (ISAM); Virtual Storage Access Method (VSAM)	4	7
05	<b>An Introduction to RDBMS</b> An informal look at the relational model; Relational Database Management System; RDBMS Properties, The Entity-Relationship Model; Overview of Relational Query Optimization; System Catalog in a Relational DBMS, Information Stored in the System Catalog, How Catalogs are Stored	3	6
06	<b>SQL – 1</b> Categories of SQL Commands; Data Definition; Data Manipulation Statements, SELECT - The Basic Form, Subqueries, Functions, GROUP BY Feature, Updating the Database, Data Definition Facilities	3	6
07	<b>SQL – 2</b>	3	7

**B.Sc. in Information Technology (Cyber Security)**  
**Effective from academic session 2022-23**

	Views; Embedded SQL *, Declaring Variables and Exceptions, Embedding SQL Statements; Transaction Processing, Consistency and Isolation, Atomicity and Durability		
08	<b>Relational Algebra</b> Basic Operations, Union (U), Difference ( - ), Intersection (∩), Cartesian Product (x); Additional Relational Algebraic Operations, Projection (π), Selection (σ), JOIN (⋈), Division (⋈÷)	3	7
09	<b>Relational Calculus</b> Tuple Relational Calculus, Semantics of TRC Queries, Examples of TRC Queries; Domain Relational Calculus; Relational ALGEBRA vs Relational CALCULUS	3	6
10	<b>Normalization</b> Functional Dependency; Anomalies in a Database; Properties of Normalized Relations; First Normalization; Second Normal Form Relation; Third Normal Form; Boyce-Codd Normal Form (BCNF); Fourth and Fifth Normal Form	4	7
11	<b>SQL Injection</b> Introduction to Injection Attacks; Data Store Injection; Introduction to XML, JavaScript and SQL injection attacks; Different Statement Injection; UNION Operator; Database Fingerprinting	4	6
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>		<b>30</b>
	<b>Total:</b>		<b>100</b>
<p><b>Practical:</b> <b>Skills to be developed:</b> Intellectual skills:</p> <ol style="list-style-type: none"> <li>1. Identify the components required to build different types of networks</li> <li>2. Choose the required functionality at each layer for given application</li> <li>3. Identify solution for each functionality at each layer</li> <li>4. Trace the flow of information from one node to another node in the network</li> </ol> <p><b>List of Practical:</b> Based on theory lectures. <b>Assignments:</b> Adhered to theory curriculum as conducted by the subject teacher.</p> <p><b>List of Books</b> <b>Text Books:</b></p>

<b>Credit: 4+2</b>		<b>Practical Sessional internal continuous evaluation: 40</b>	
		<b>Practical Sessional external examination: 60</b>	
<b>Aim:</b>			
<b>Sl. No.</b>			
1.	This introductory course is aimed at giving basic understanding about system security.		
2.	This entry-level course covers a broad spectrum of security topics and is based on real-life examples to create system security interest in the students		
3.	A balanced mix of technical and managerial issues makes this course appealing to attendees who need to understand the salient facets of information security basics and the basics of risk management.		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	Develop an understanding of information assurance as practiced in computer operating systems, distributed systems, networks and representative applications.		
2.	Gain familiarity with prevalent network and distributed system attacks, defences against them, and forensics to investigate the aftermath.		
3.	Develop a basic understanding of cryptography, how it has evolved, and some key encryption techniques used today.		
4.	Develop an understanding of security policies (such as authentication, integrity and confidentiality), as well as protocols to implement such policies in the form of message exchanges		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Not Required		
<b>Contents</b>			<b>4 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Information and Network Security fundamentals</b> Overview of Networking Concepts Basics of Communication Systems, Transmission Media, Topology and Types of Networks, TCP/IP Protocol, Wireless Networks, The Internet Information Security Concepts Information Security Overview: Background and Current Scenario, Types of Attacks, Goals for Security, E-commerce Security Security Threats and Vulnerabilities Overview of Security threats, Weak / Strong Passwords and Password Cracking, Insecure Network connections, Malicious Code Cybercrime and Cyber terrorism Cryptography Introduction to Cryptography, Digital Signatures, Public Key infrastructure, Applications of Cryptography, Tools and techniques of	16	20

	Cryptography		
02	<b>Security Management</b> Security Management Practices Overview of Security Management, Security Policy, Risk Management, Ethics and Best Practices Security Laws and Standards Security Assurance, Security Laws, International Standards, Security Audit	8	10
03	<b>Information and Network Security</b> Server Management and Firewalls User Management, Overview of Firewalls, Types of Firewalls, DMZ and firewall features Security for VPN and Next Generation Technologies VPN Security, Security in Multimedia Networks, Various Computing Platforms: HPC, Cluster and Computing Grids, Virtualization and Cloud Technology and Security	6	20
04	<b>System and Application Security</b> Security Architectures and Models Designing Secure Operating Systems, Controls to enforce security services, Information Security Models System Security Desktop Security, Email security, Database Security	6	20

	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	<b>4</b>	<b>30</b>
	<b>Total:</b>	<b>40</b>	<b>100</b>

**Practical:**

**Skills to be developed:**

Intellectual skills:

1. The ability to learn concepts and apply them to other problems.
2. A passion for problem finding.
3. Confidence around different computer application tools.

**List of Practical:**

1. Application of AVISPA Tool
2. Study of Network Security fundamentals - Ethical Hacking, Social Engineering practices.
3. Study of System threat attacks - Denial of Services.
4. Study of Sniffing and Spoofing attacks.
5. Study of Techniques uses for Web Based Password Capturing.
6. Study of Different attacks causes by Virus and Trojans.
7. Study of Anti-Intrusion Technique – Honey pot.
8. Study of Symmetric Encryption Scheme – RC4.
9. Study of IP based Authentication.

**Assignments:**

1. Based on theory lectures.

<b>Name of the Course:</b> B.Sc. in Information Technology (Cyber Security)	
<b>Subject:</b> Web Development	
<b>Course Code:</b> BITCSS391	<b>Semester:</b> III
<b>Duration:</b> 36 Hrs.	<b>Maximum Marks:</b> 100
<b>Teaching Scheme</b>	<b>Examination Scheme</b>
Theory: 0	End Semester Exam: NA
Tutorial: 0	Attendance: NA

Practical:4	Continuous Assessment: NA
Credit:2	Practical Sessional internal continuous evaluation: 40
	Practical Sessional external examination: 60
<b>Aim:</b>	
<b>Sl. No.</b>	
	To develop formal reasoning.
	Create habit of raising questions
	Knowledge regarding the use of markup languages in web development.
	Ability to communicate knowledge, capabilities and skills related to the computer engineer profession
<b>Objective:</b>	
This Subject is useful for Making own Web page and how to host own web site on internet. Along with that Students will also learn about the protocols involve in internet technology.	
<b>Sl. No.</b>	
	To make own web site and host their own web site on internet
	To gain knowledge about what are the technologies used in internet.
	To learn about the protocols involve in internet.
<b>Practical:</b>	
<b>Skills to be developed:</b>	
<b>Intellectual skills:</b>	
1 Skill to analyze problems and to determine web based solutions.	
2 Knowledge of advanced technology of web development.	
3 Ability to implement queries to perform various operations on database.	
<b>List of Practical:</b>	
1	Design web pages for your college containing a description of the courses, departments, faculties, library etc, use href, list tags.
2	Create your class timetable using table tag.
3	Create user Student feedback form (use textbox, text area , checkbox, radio button, select box etc.)
4	Create a web page using frame. Divide the page into two parts with Navigation links on left hand side of page (width=20%) and content page on right hand side of page (width = 80%). On clicking the navigation Links corresponding content must be shown on the right hand side.
5	Write html code to develop a webpage having two frames that divide the webpage into two equal rows and then divide the row into equal columns fill each frame with a different background color.
6	Create your resume using HTML tags also experiment with colors, text , link , size and also other tags you studied.
7	Design a web page of your home town with an attractive background color, text color, an Image, font etc. (use internal CSS).
8	Use Inline CSS to format your resume that you created.
9	Use External CSS to format your class timetable as you created.
10	Use External, Internal, and Inline CSS to format college web page that you created.
11	Develop a JavaScript to display today's date.
12	Develop simple calculator for addition, subtraction, multiplication and division operation

- using JavaScript
- 13 Create HTML Page with JavaScript which takes Integer number as input and tells whether the number is ODD or EVEN.
  - 14 Create DTD for above XML File.
  - 15 Create XML Schema for above ( Practical No. 18 )
  - 16 Create XSL file to convert above (refer Practical No. 17 ) XML file into XHTMLfile.
  - 17 Write a php program to display today's date in dd-mm-yyyy format.
  - 18 Write a php program to check if number is prime or not.
  - 19 Create HTML page that contain textbox, submit / reset button. Write php program to display this information and also store into text file.
  - 20 Write PHP Script for storing and retrieving user information from MySql table.
    1. Design A HTML page which takes Name, Address, Email and Mobile No. From user ( register.php )
  - 21 Store this data in Mysql database / text file.
  - 22 Students have to create a whole Website which contains above topics in Website.

**Assignments:**

Based on the curriculum as covered by subject teacher.

**List of Books**

**Text Books:**

<b>Credit:</b> 4 + 2	<b>Practical Sessional internal continuous evaluation:</b> 40
	<b>Practical Sessional external examination:</b> 60
<b>Aim:</b>	
<b>Sl. No.</b>	
1.	To gain knowledge of computer networks.
2.	To gain knowledge of several layers and network architectures
3.	To gain knowledge of communication through networks, protocols and algorithms.
<b>Objective:</b>	
<b>Sl. No.</b>	
1.	Understand the division of network functionalities into layers.
2.	Be familiar with the components required to build different types of networks Be exposed to the required functionality at each layer
3.	Learn the flow control and congestion control algorithms
<b>Pre-Requisite:</b>	
<b>Sl. No.</b>	
1.	Understanding of algorithms

2.	Understanding of basic computer architecture		
<b>Contents</b>		<b>3 Hrs./week</b>	
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>FUNDAMENTALS &amp; LINK LAYER</b> Building a network – Requirements – Layering and protocols – Internet Architecture – Network software – Performance ; Link layer Services – Framing – Error Detection – Flow control	7	14
02	<b>MEDIA ACCESS &amp; INTERNETWORKING</b> Media access control – Ethernet (802.3) – Wireless LANs – 802.11 – Bluetooth – Switching and bridging – Basic Internetworking (IP, CIDR, ARP, DHCP, ICMP )	7	14
03	<b>ROUTING</b> Routing (RIP, OSPF, metrics) – Switch basics – Global Internet (Areas, BGP, IPv6), Multicast – addresses – multicast routing (DVMRP, PIM)	7	14
04	<b>TRANSPORT LAYER</b> Overview of Transport layer – UDP – Reliable byte stream (TCP) – Connection management – Flow control – Retransmission – TCP Congestion control – Congestion avoidance (DECbit, RED) – QoS – Application requirements	8	14
05	<b>APPLICATION LAYER</b> Traditional applications -Electronic Mail (SMTP, POP3, IMAP, MIME) – HTTP – Web Services – DNS – SNMP	7	14

<b>Credit:</b> 6	<b>Practical Sessional internal continuous evaluation:</b> NA
	<b>Practical Sessional external examination:</b> NA
<b>Aim:</b>	
<b>Sl. No.</b>	
<b>1.</b>	To learn foundations of Cyber Security and Ethical Hacking analysis using programming languages like python.
<b>2.</b>	To learn various types of algorithms and its applications of Cyber Security and Ethical Hacking using forensic detection
<b>3.</b>	To learn python toolkit for required for programming Cyber Security, Ethical Hacking concepts
<b>4.</b>	To understand the concepts of Cyber Security, Ethical Hacking Forensic detection image

	processing, pattern recognition, and natural language processing.		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	Understand, appreciate, employ, design and implement appropriate security technologies and policies to protect computers and digital information.		
2.	Identify & Evaluate Information Security threats and vulnerabilities in Information Systems and apply security measures to real time		
3.	Identify common trade-offs and compromises that are made in the design and development process of Information		
4.	Demonstrate the use of standards and cyber laws to enhance information security in the development process and infrastructure protection.		
<b>Contents</b>			<b>4 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Introduction to Cyber Security</b> Overview of Cyber Security, Internet Governance – Challenges and Constraints, Cyber Threats:- Cyber Warfare-Cyber Crime-Cyber terrorism-Cyber Espionage, Need for a Comprehensive Cyber Security Policy, Need for a Nodal Authority, Need for an International convention on Cyberspace.	7	10
02	<b>Cyber Security Vulnerabilities and Cyber Security Safeguards</b> Cyber Security Vulnerabilities-Overview, vulnerabilities in software, System administration, Complex Network Architectures, Open Access to Organizational Data, Weak Authentication, Unprotected Broadband communications, Poor Cyber Security Awareness. Cyber Security Safeguards- Overview, Access control, Audit, Authentication, Biometrics, Cryptography, Deception, Denial of Service Filters, Ethical Hacking, Firewalls, Intrusion Detection Systems, Response, Scanning, Security policy, Threat Management	5	10
03	<b>Securing Web Application, Services and Servers</b> Introduction, Basic security for HTTP Applications and Services, Basic Security for SOAP Services, Identity Management and Web Services, Authorization Patterns, Security Considerations, Challenges.	5	10
04	<b>Intrusion Detection and Prevention</b> Intrusion, Physical Theft, Abuse of Privileges, Unauthorized Access by Outsider, Malware infection, Intrusion detection and Prevention Techniques, Anti-Malware software, Network based Intrusion detection Systems, Network based Intrusion Prevention Systems, Host based Intrusion prevention Systems, Security Information Management, Network Session Analysis, System Integrity Validation.	6	10
05	<b>Cryptography and Network Security</b> Introduction to Cryptography, Symmetric key Cryptography,	5	10

**B.Sc. in Information Technology (Cyber Security)**  
**Effective from academic session 2022-23**

	Asymmetric key Cryptography, Message Authentication, Digital Signatures, Applications of Cryptography. Overview of Firewalls-Types of Firewalls, User Management, VPN Security Security Protocols: - security at the Application Layer- PGP and S/MIME, Security at Transport Layer- SSL and TLS, Security at Network Layer- IPsec.		
06	<b>Cyberspace and the Law</b> Introduction, Cyber Security Regulations, Roles of International Law, the state and Private Sector in Cyberspace, Cyber Security Standards. The INDIAN Cyberspace, National Cyber Security Policy 2013.	5	10
07	<b>Cyber Forensics</b> Introduction to Cyber Forensics, Handling Preliminary Investigations, Controlling an Investigation, Conducting disk-based analysis, Investigating Information-hiding, Scrutinizing E-mail, Validating E-mail header information, Tracing Internet access, Tracing memory in real-time.	5	10
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	<b>4</b>	<b>30</b>

<b>Name of the Course:</b> B.Sc. in Information Technology (Cyber Security)	
<b>Subject:</b> Information and Coding Theory	
<b>Course Code:</b> BITCSC501	<b>Semester:</b> V
<b>Duration:</b> 36 Hrs.	<b>Maximum Marks:</b> 100
<b>Teaching Scheme</b>	<b>Examination Scheme</b>
<b>Theory:</b> 5	<b>End Semester Exam:</b> 70
<b>Tutorial:</b> 1	<b>Attendance :</b> 5
<b>Practical:</b> 0	<b>Continuous Assessment:</b> 25
<b>Credit:</b> 6	<b>Practical Sessional internal continuous evaluation:</b> NA
	<b>Practical Sessional external examination:</b> NA
<b>Aim:</b>	
<b>Sl. No.</b>	
1.	Introduced to the basic notions of information and channel capacity.
2.	To introduce information theory, the fundamentals of error control coding techniques and their applications, and basic cryptography.
3.	To provide a complementary U/G physical layer communication
4.	to convolutional and block codes, decoding techniques, and automatic repeat request (ARQ) schemes.

<b>Objective:</b>			
<b>Sl. No.</b>			
1.	Understand how error control coding techniques are applied in communication systems.		
2.	Able to understand the basic concepts of cryptography.		
3.	To enhance knowledge of probabilities, entropy, measures of information.		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Probability and Statistics		
<b>Contents</b>			<b>4 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>INFORMATION ENTROPY FUNDAMENTALS</b> Uncertainty, Information and Entropy – Source coding Theorem – Huffman coding – Shannon Fano coding – Discrete Memory less channels – channel capacity – channel coding Theorem – Channel capacity Theorem.	12	23
02	<b>DATA AND VOICE CODING</b> Differential Pulse code Modulation – Adaptive Differential Pulse Code Modulation – Adaptive subband coding – Delta Modulation – Adaptive Delta Modulation – Coding of speech signal at low bit rates (Vocoders, LPC). Denial of Service Attacks, DOS-proof network architecture, Security architecture of World Wide Web, Security Architecture of Web Servers, and Web Clients, Web Application Security – Cross Site Scripting Attacks, Cross Site Request Forgery, SQL Injection Attacks, Content Security Policies (CSP) in web, Session Management and User Authentication, Session Integrity, Https, SSL/TLS, Threat Modeling, Attack Surfaces, and other comprehensive approaches to network design for security	12	24
03	<b>ERROR CONTROL CODING</b> Linear Block codes – Syndrome Decoding – Minimum distance consideration – cyclic codes – Generator Polynomial – Parity check polynomial – Encoder for cyclic codes – calculation of syndrome – Convolutional codes.	12	23

<b>Name of the Course:</b> B.Sc. in Information Technology (Cyber Security)	
<b>Subject:</b> Cyber Law and IPR	
<b>Course Code:</b> BITCSC502	<b>Semester:</b> V
<b>Duration:</b> 36 Hrs.	<b>Maximum Marks:</b> 100
<b>Teaching Scheme</b>	<b>Examination Scheme</b>
<b>Theory:</b> 5	<b>End Semester Exam:</b> 70
<b>Tutorial:</b> 1	<b>Attendance :</b> 5
<b>Practical:</b> 0	<b>Continuous Assessment:</b> 25
<b>Credit:</b> 6	<b>Practical Sessional internal continuous evaluation:</b> NA
	<b>Practical Sessional external examination:</b> NA
<b>Aim:</b>	
<b>Sl. No.</b>	
1.	To provide knowledge related to auditing of computer systems, managing and mitigating risk situations in the organization and techniques for investigating financial frauds.

2.	To create awareness on cybercrime & IT law.		
3.	Provide the assistance to handle cybercrime.		
4.	To protect the girls against the cybercrime.		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	This course will look at the emerging legal, policy and regulatory issues pertaining to cyberspace and cybercrimes		
2.	To cover all the topics from fundamental knowledge of Information Technology and Computer Architecture so that the participant can use to understand various aspects of working of a computer.		
3.	To enable the participants appreciate, evaluate and interpret the case laws with reference to the IT Act and other Laws associated with the cyberspace.		
4.	To identify the emerging Cyberlaws, Cybercrime & Cyber security trends and jurisprudence impacting cyberspace in today's scenario.		
<b>Contents</b>		<b>4 Hrs./week</b>	
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Introduction to Cyberspace, Cybercrime and Cyber Law</b> The World Wide Web, Web Centric Business, e-Business Architecture, Models of e-Business, e-Commerce, Threats to virtual world. IT Act 2000 - Objectives, Applicability, Non-applicability, Definitions, Amendments and Limitations. Cyber Crimes- Cyber Squatting, Cyber Espionage, Cyber Warfare, Cyber Terrorism, Cyber Defamation. Social Media-Online Safety for women and children, Misuse of Private information.	9	17
02	<b>Regulatory Framework of Information and Technology Act 2000</b> Information Technology Act 2000, Digital Signature, E-Signature, Electronic Records, Electronic Evidence and Electronic Governance. Controller, Certifying Authority and Cyber Appellate Tribunal. (Rules announced under the Act), Network and Network Security, Access and Unauthorized Access, Data Security, E Contracts and E Forms.	9	17
03	<b>Offences and Penalties</b> Information Technology (Amendment) Act 2008 – Objective, Applicability and Jurisdiction; Various cyber-crimes under Sections 43 (a) to (j), 43A, 65, 66, 66A to 66F, 67, 67A, 67B, 70, 70A, 70B, 80 etc. along with respective penalties, punishment and fines, Penal Provisions for Phishing, Spam, Virus, Worms, Malware, Hacking, Trespass and Stalking; Human rights in cyberspace, International Co-operation in investigating cybercrimes.	9	18
04	<b>Indian Evidence Act &amp; Intellectual property rights</b> Classification – civil, criminal cases. Essential elements of criminal law. Constitution and hierarchy of criminal courts. Criminal Procedure Code. Cognizable and non-cognizable offences. Bailable and non-bailable offences. Sentences which the court of Chief Judicial Magistrate may pass. Indian Evidence Act – Evidence and rules of relevancy in brief. Expert witness. Cross examination and re-examination of witnesses. Sections 32, 45, 46, 47, 57, 58, 60, 73, 135, 136, 137, 138, 141. Section 293 in the code of criminal procedure. Secondary Evidence Section 65-B. Intellectual property rights.	9	18

	<b>Sub Total:</b>	<b>36</b>	<b>70</b>

**Teaching Scheme**

**Examination Scheme**

<b>Theory: 5</b>		<b>End Semester Exam: 70</b>	
<b>Tutorial: 1</b>		<b>Attendance : 5</b>	
<b>Practical: 0</b>		<b>Continuous Assessment: 25</b>	
<b>Credit: 6</b>		<b>Practical Sessional internal continuous evaluation: NA</b>	
		<b>Practical Sessional external examination: NA</b>	
<b>Aim:</b>			
<b>Sl. No.</b>			
1.	To understand the fundamentals of Cryptography		
2.	To acquire knowledge on standard algorithms used to provide confidentiality, integrity and authenticity.		
3.	To understand the various key distribution and management schemes		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	To design security applications in the field of Information technology		
2.	To understand how to deploy encryption techniques to secure data in transit across data networks		
3.	Analyze the vulnerabilities in any computing system and hence be able to design a security solution.		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Cryptography		
<b>Contents</b>		<b>3 Hrs./week</b>	
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Introduction</b> Terminologies used in Cryptography; Substitution Techniques – The Caesar Cipher, One-Time Pads, The Vernam Cipher, Book Cipher; Transposition Techniques – Encipherment/Decipherment Complexity, Digrams, Trigrams, and Other Patterns.	7	14
02	<b>Steganography and Watermarking</b> History of watermarking – Importance of digital watermarking – Applications – Properties – Evaluating watermarking systems. WATERMARKING MODELS & MESSAGE CODING: Notation – Communications – Communication based models – Geometric models – Mapping messages into message vectors – Error correction coding – Detecting multi-symbol watermarks.	7	14
03	<b>Encryption for Images&amp; Videos</b>	7	14
04	<b>Steganography:</b> Steganography communication – Notation and terminology – Information theoretic foundations of steganography – Practical steganographic methods – Minimizing the embedding impact – Steganalysis	7	14
05	<b>Type of Attacks</b> Need for Security; Security Attack – Threats, Vulnerabilities, and Controls, Types of Threats (Attacks); Security Services – Confidentiality, Integrity, Availability; Information Security; Methods of Protection.	8	14

**B.Sc. in Information Technology (Cyber Security)**

Effective from academic session 2022-23

<b>Name of the Course:</b> B.Sc. in Information Technology (Cyber Security)			
<b>Subject:</b> Threats in Mobile Application			
<b>Course Code:</b> BITCSD501B		<b>Semester:</b> V	
<b>Duration:</b> 36 Hrs.		<b>Maximum Marks:</b> 100	
<b>Teaching Scheme</b>		<b>Examination Scheme</b>	
<b>Theory:</b> 5		<b>End Semester Exam:</b> 70	
<b>Tutorial:</b> 1		<b>Attendance :</b> 5	
<b>Practical:</b> 0		<b>Continuous Assessment:</b> 25	
<b>Credit:</b> 6		<b>Practical Sessional internal continuous evaluation:</b> NA	
		<b>Practical Sessional external examination:</b> NA	
<b>Aim:</b>			
<b>Sl. No.</b>			
1.	Get to know the most important security risks (OWASP Mobile Top 10) of mobile apps with the aid of intentionally vulnerable mobile apps for iPhone and Android.		
2.	Give overview of security architecture of a Mobile.		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	The security architecture of Android and iOS, you will be guided through various application vulnerabilities and the corresponding countermeasures		
2.	To apply what you have learned to your company's mobile application projects and will gain the competence for secure development and evaluation (self-assessment) of mobile apps		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Good understanding of mobile devices advantageous		
2.	Ability to read and understand source code		
<b>Contents</b>			
		<b>3 Hrs./week</b>	
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Software and System Security</b> Control hijacking attacks – buffer overflow, integer overflow, bypassing browser memory protection, Sandboxing and Isolation, Tools and techniques for writing robust application software, Security vulnerability detection tools, and techniques – program analysis (static, concolic and dynamic analysis), Privilege, access control, and Operating System Security, Exploitation techniques, and Fuzzing	7	14
02	<b>Network Security &amp; Web Security</b> Security Issues in TCP/IP – TCP, DNS, Routing (Topics such as basic problems of security in TCP/IP,, IPsec, BGP Security, DNS Cache poisoning etc), Network Defense tools – Firewalls, Intrusion Detection, Filtering, DNSSec, NSec3, Distributed Firewalls, Intrusion Detection tools, Threat Models, Denial of Service Attacks, DOS-proof network architecture, Security architecture of World Wide Web, Security Architecture of Web Servers, and Web Clients, Web Application Security – Cross Site Scripting Attacks, Cross Site Request Forgery, SQL Injection Attacks, Content Security Policies (CSP) in web, Session Management and User Authentication, Session Integrity, Https, SSL/TLS, Threat Modeling, Attack Surfaces, and other comprehensive approaches to network design for security	8	14
03	<b>Security in Mobile Platforms</b>	7	14

	Android vs. iOS security model, threat models, information tracking, rootkits, Threats in mobile applications, analyzer for mobile apps to discover security vulnerabilities, Viruses, spywares, and keyloggers and malware detection		
04	<b>Introduction to Hardware Security, Supply Chain Security</b> Threats of Hardware Trojans and Supply Chain Security, Side Channel Analysis based Threats, and attacks	7	14
05	<b>Issues in Critical Infrastructure and SCADA Security</b> Security issues in SCADA, IP Convergence Cyber Physical System Security threats, Threat models in SCADA and various protection approaches, Machine learning and SCADA Security	7	14
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>

<b>Aim:</b>			
<b>Sl. No.</b>			
<b>1</b>	To gain comprehensive knowledge of Internet and its working.		
<b>2</b>	Ability to use services offered by internet.		
<b>3</b>	To enhance skill to develop websites using HTML , CSS, JS.		
<b>Objective:</b>			
<b>Sl. No.</b>			
<b>1</b>	To introduce the students to the network of networks -Internet.		
<b>2</b>	To enable the students to use various services offered by internet.		
<b>3</b>	To gain knowledge about the protocols used in various services of internet.		
<b>4</b>	To understand the working and applications of Intranet and Extranet.		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
<b>1</b>	Understanding of basic programming logic.		
<b>Contents</b>	<b>Hrs./week</b>		
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	Introduction to Networking Overview of Networking, Intranet, Extranet and Internet, Domain and	8	12

	Sub domain, Address Resolution, DNS, Telnet, FTP, HTTP, Features, Segment, Three-Way Handshaking, Flow Control, Error Control, Congestion control, IP Datagram, IPv4 and IPv6, Classful and Classless Addressing, Subnetting. NAT, IP masquerading, IPTables, Routing -Intra and Inter Domain Routing, Unicast and Multicast Routing, Broadcast, Electronic Mail		
02	Web Programming  Introduction to HTML, Editors, Elements, Attributes, Heading, Paragraph. Formatting, Link, Head, Table, List, Block, Layout, CSS. Form, Iframe, Colors, Color name, Color value, Image Maps, area, attributes of image area, Extensible Markup Language (XML), CGI Scripts, GET and POST Methods.	8	15
03	Server Side Programming and Scripting  Basic PHP Programming, Variable, Condition, Loop, Array, Implementing data structure, Hash, String, Regular Expression, File handling, I/O handling, JavaScript basics, Statements, comments, variable, comparison, condition, switch, loop, break. Object – string, array, Boolean, reg-ex. Function, Errors, Validation, Definition of cookies, Create and Store cookie.	8	15
04	Security Issues  Network security techniques, Password and Authentication, VPN, IP Security, security in electronic transaction, Secure Socket Layer(SSL), Secure Shell (SSH), Introduction to Firewall, Packet filtering, Stateful, Application layer, Proxy.	6	13
05	Advance Internet Technology  Internet Telephony (VoIP), Multimedia Applications, Multimedia over IP: RSVP, RTP, RTCP and RTSP. Streamingmedia, Codec and Plugins, IPTV, Search Engine Optimization, Metadata.	6	15

<b>Name of the Course:</b> B.Sc. in Information Technology (Cyber Security)			
<b>Subject:</b> Security Assessment and Risk Analysis			
<b>Course Code:</b> BITCSD502A		<b>Semester:</b> V	
<b>Duration:</b> 36 Hrs.		<b>Maximum Marks:</b> 100	
<b>Teaching Scheme</b>		<b>Examination Scheme</b>	
<b>Theory:</b> 5		<b>End Semester Exam:</b> 70	
<b>Tutorial:</b> 1		<b>Attendance :</b> 5	
<b>Practical:</b> 0		<b>Continuous Assessment:</b> 25	
<b>Credit:</b> 6		<b>Practical Sessional internal continuous evaluation:</b> NA	
		<b>Practical Sessional external examination:</b> NA	
<b>Aim:</b>			
<b>Sl. No.</b>			
1.	It will provide a background in the many aspects of security management associated with today's modern communications and networks		
2.	It includes the fundamentals of Risk Analysis, Risk Management, Security Policy, Security Operations, Legal issues, Business issues and Secure Systems Development.		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	Understand the role of Security Management in information technology		
2.	Quantify the properties of Information Security systems		
3.	Develop project plans for secure complex systems with knowledge of SANS 20 critical controls		
4.	Demonstrate understanding of the role of firewalls, guards, proxy servers and intrusion detection in networks on a Linux OS with traffic analysis		
5.	Evaluate the residual risk of a protected network		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Application of cryptography		
<b>Contents</b>			<b>3 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Risk Assessment</b> Understand the principles and terminology of risk; Probability, Likelihood, Threat, Vulnerability, Impact , Threat actor, Risk owner, Understand and describe the five key steps in risk management: Identify assets Identify threats and vulnerabilities, Assess the impact of threats and vulnerabilities on an organisation Identify ways to manage those threats and vulnerabilities, Monitor and report on risk management action, Discuss qualitative and quantitative approaches to risk assessment; Quantitative approaches (such as loss expectancy approaches (SLE/ARO)), Quantitative scalar approaches (such as High/Medium/Low), Illustrate how the results of an assessment can be presented; Financial impact, Dashboards, Heat maps, RAG.	12	23
02	<b>Risk Assessment: Threat and Vulnerabilities</b> Define and state the differences between: Threat, Vulnerability, Exploit, Attack, Describe and explain the following: Categories of threats The concept of a threat lifecycle The use of threat intelligence in an organisation. The uses of attribution, Discuss	12	23

**B.Sc. in Information Technology (Cyber Security)**  
**Effective from academic session 2022-23**

	vulnerabilities, especially those relating to people and staff. Apprentices will understand how they can be exploited to attack an organisation; Phishing, Social engineering, Blended attacks, Describe common methods for finding vulnerabilities; Penetration testing Phishing simulators Social engineering attacks						
03	<b>Risk Assessment: Standards</b> Explain that risk assessment can be carried out using several methodologies or frameworks, but that it is better to select one methodology or framework for consistent and comparable results, List the common risk assessment methodologies or frameworks; ISO/IEC 27005, NIST, Risk Management, Framework, OCTAVE, FAIR, Compare common risk methodologies/frameworks; highlighting similarities and differences. Demonstrate how to select and then apply a risk methodology/framework in an organisation.		12	24

<b>Aim: The main aim of this subject to enhance student knowledge with following concept</b>			
<b>Sl. No.</b>			
1.	Core concepts of the cloud computing		
2.	Concepts in cloud infrastructures		
3.	Concepts of cloud storage		
4.	Cloud programming models		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	To learn how to use Cloud Services.		
2.	To implement Virtualization		
3.	To implement Task Scheduling algorithms.		
4.	Understand the impact of engineering on legal and societal issues involved and different security aspect.		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Knowledge of computer systems, programming and debugging, with a strong competency in at least one language (such as Java/Python), and the ability to pick up other languages as needed.		
<b>Contents</b>			<b>3 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Definition of Cloud Computing and its Basics</b> Defining a Cloud, Cloud Types – NIST model, Cloud Cube model, Deployment models (Public , Private, Hybrid and Community Clouds), Service Platform as a Service, Software as a Service with examples of services/ service providers, models – Infrastructure as a Service, Cloud Reference model, Characteristics of Cloud Computing – a shift in paradigm Benefits and advantages of Cloud Computing, A brief introduction on Composability, Infrastructure, Platforms, Virtual Appliances, Communication Protocols, Applications, Connecting to the Cloud by Clients, IaaS – Basic concept, Workload, partitioning of virtual private server instances, Pods, aggregations, silos PaaS – Basic concept, tools and development environment with examples SaaS - Basic concept and characteristics, Open SaaS and SOA, examples of SaaS platform Identity as a Service (IDaaS) Compliance as a Service (CaaS)	6	15
02	<b>Use of Platforms in Cloud Computing</b> Concepts of Abstraction and Virtualization Virtualization technologies : Types of virtualization (access, application, CPU, storage), Mobility patterns (P2V, V2V, V2P, P2P, D2C, C2C, C2D, D2D) Load Balancing and Virtualization: Basic	14	20

	<p>Concepts, Network resources for load balancing, Advanced load balancing (including Application Delivery Controller and Application Delivery Network), Mention of The Google Cloud as an example of use of load balancing Hypervisors: Virtual machine technology and types, VMware vSphere Machine Imaging (including mention of Open Virtualization Format – OVF)</p> <p>Porting of applications in the Cloud: The simple Cloud API and AppZero Virtual Application appliance, Concepts of Platform as a Service, Definition of services, Distinction between SaaS and PaaS (knowledge of Salesforce.com and Force.com), Application development</p> <p>Use of PaaS Application frameworks, Discussion of Google Applications Portfolio – Indexed search, Dark Web, Aggregation and disintermediation, Productivity applications and service, Adwords, Google Analytics, Google Translate, a brief discussion on Google Toolkit (including introduction of Google APIs in brief), major features of Google App Engine service., Discussion of Google Applications Portfolio – Indexed search, Dark Web, Aggregation and disintermediation, Productivity applications and service, Adwords, Google Analytics, Google Translate, a brief discussion on Google Toolkit (including introduction of Google APIs in brief), major features of Google App Engine service, Windows Azure platform: Microsoft’s approach, architecture, and main elements, overview of Windows Azure AppFabric, Content Delivery Network, SQL Azure, and Windows Live services,</p>		
03	<p><b>Cloud Infrastructure</b></p> <p>Cloud Management: An overview of the features of network management systems and a brief introduction of related products from large cloud vendors, Monitoring of an entire cloud computing deployment stack – an overview with mention of some products, Lifecycle management of cloud services (six stages of lifecycle).</p> <p>Concepts of Cloud Security: Cloud security concerns, Security boundary, Security service boundary Overview of security mapping Security of data: Brokered cloud storage access, Storage location and tenancy, encryption, and auditing and compliance</p> <p>Identity management (awareness of Identity protocol standards)</p>	8	20
04	<p><b>Concepts of Services and Applications</b></p> <p>Service Oriented Architecture: Basic concepts of message-based transactions, Protocol stack for an SOA architecture, Event-driven SOA, Enterprise Service Bus, Service catalogs, Applications in the Cloud: Concepts of cloud transactions, functionality mapping,</p>	8	15

	Application attributes, Cloud service attributes, System abstraction and Cloud Bursting, Applications and Cloud APIs Cloud-based Storage: Cloud storage definition – Manned and Unmanned Webmail Services: Cloud mail services including Google Gmail, Mail2Web, Windows Live Hotmail, Yahoo mail, concepts of Syndication services																										
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>

<b>Credit:</b> 6	<b>Practical Sessional internal continuous evaluation:</b> NA
	<b>Practical Sessional external examination:</b> NA
<b>Aim:</b>	
<b>Sl. No.</b>	

1.	Demonstrate knowledge of the basic physical and biological science and engineering principles underlying biometric systems		
2.	Understand and analyze biometric systems at the component level and be able to analyze and design basic biometric system applications		
3.	Be able to work effectively in teams and express their work and ideas orally and in writing.		
4.	Identify the sociological and acceptance issues associated with the design and implementation of biometric systems		
5.	Understand various Biometric security issues		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	To provide students with understanding of biometrics, biometric equipment and standards applied to security.		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Fundamental knowledge in Biometrics		
<b>Contents</b>			<b>4 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>Overview of Biometrics</b> Definitions, biometric modalities, basic applications, access control, security	7	14
02	<b>Biometric System Architecture</b> Scanning/digitizing, enhancement, feature extraction, classification, matching, searching and verification.	7	14
03	<b>Probability, statistics and estimation Random variables</b> Discrete and continuous distribution - pattern classification and recognition - Signals in time and frequency domain – multivariate statistical analysis.	8	14
04	<b>Algorithms</b> Face recognition Voice Recognition Fingerprint Recognition Iris Recognition Other biometric modalities: Retina, signature, hand geometry, gait, keystroke Quantitative analysis on the biometrics, Performance evaluation in Biometrics – false acceptance rate; false rejection rate.	7	14
05	<b>Multimodal Biometric systems</b> Biometric system integration, multimodal biometric systems: theory and applications, performance evaluation of multimodal biometric systems. Biometric System Security: Biometric attacks/tampering; solutions; biometric encryption	7	14

<b>Credit:</b> 6	<b>Practical Sessional internal continuous evaluation:</b> NA
	<b>Practical Sessional external examination:</b> NA
<b>Aim:</b>	
Sl. No.	

1.	Explain cryptographic building blocks and reason about their security		
2.	Define Bitcoin's consensus mechanism		
3.	Learn how the individual components of the Bitcoin protocol make the whole system work: transactions, script, blocks, and the peer-to-peer network		
4.	Define how mining can be re-designed in alternative cryptocurrencies		
<b>Objective:</b>			
<b>Sl. No.</b>			
1.	To learn Blockchain systems: Nuts and Bolts		
2.	Able to analyse Decentralized systems		
3.	To understand Tokenization and ICOs		
4.	To describe Cryptography of Blockchain		
<b>Pre-Requisite:</b>			
<b>Sl. No.</b>			
1.	Database System		
2.	Cryptography		
3.	Basic Financial Knowledge		
<b>Contents</b>			<b>4 Hrs./week</b>
<b>Chapter</b>	<b>Name of the Topic</b>	<b>Hours</b>	<b>Marks</b>
01	<b>INTRODUCTION</b> Need for Distributed Record Keeping, Modeling faults and adversaries, Byzantine Generals problem, Consensus algorithms and their scalability problems, Why Nakamoto Came up with Blockchain based cryptocurrency? Technologies Borrowed in Blockchain – hash pointers, consensus, byzantine fault-tolerant distributed computing, digital cash etc.	6	12
02	<b>Basic Distributed Computing</b> Atomic Broadcast, Consensus, Byzantine Models of fault tolerance	6	11
03	<b>Basic Crypto primitives</b> Hash functions, Puzzle friendly Hash, Collision resistant hash, digital signatures, public key crypto, verifiable random functions, Zero-knowledge systems	6	11
04	<b>Blockchain 1.0</b> Bitcoin blockchain, the challenges, and solutions, proof of work, Proof of stake, alternatives to Bitcoin consensus, Bitcoin scripting language and their use	6	11
05	<b>Blockchain 2.0</b> Ethereum and Smart Contracts, The Turing Completeness of Smart Contract Languages and verification challenges, Using smart contracts to enforce legal contracts, comparing Bitcoin scripting vs. Ethereum Smart Contracts	6	12
05	<b>Blockchain 3.0</b> Hyperledger fabric, the plug and play platform and mechanisms in permissioned blockchain	6	11

06	<b>Privacy, Security issues in Blockchain</b> Pseudo-anonymity vs. anonymity, Zcash and Zk-SNARKS for anonymity preservation, attacks on Blockchains – such as Sybil attacks, selfish mining, 51% attacks - advent of algorand, and Sharding based consensus algorithms to prevent these	6	12

<b>Name of the Course:</b> B.Sc. in Information Technology (Cyber Security)	
<b>Subject:</b> Secure Software Design & Enterprise Computing	
<b>Course Code:</b> BITCSD601C	<b>Semester:</b> VI
<b>Duration:</b> 36 Hrs.	<b>Maximum Marks:</b> 100
<b>Teaching Scheme</b>	<b>Examination Scheme</b>
<b>Theory:</b> 5	<b>End Semester Exam:</b> 70
<b>Tutorial:</b> 1	<b>Attendance :</b> 5
<b>Practical:</b> 0	<b>Continuous Assessment:</b> 25
<b>Credit:</b> 6	<b>Practical Sessional internal continuous evaluation:</b> NA
	<b>Practical Sessional external examination:</b> NA
<b>Aim:</b>	
<b>Sl. No.</b>	
1.	The course takes a software development perspective to the challenges of engineering software systems that are secure.
2.	This course addresses design and implementation issues critical to producing secure software systems.
3.	The course deals with the question of how to make the requirements for confidentiality, integrity, and availability integral to the software development process from requirements gathering to design, development, configuration, deployment, and ongoing maintenance
<b>Objective:</b>	
<b>Sl. No.</b>	
1.	Understand various aspects and principles of software security.
2.	Devise security models for implementing at the design level
3.	Identify and analyze the risks associated with s/w engineering and use relevant models to mitigate the risks.
4.	Understand the various security algorithms to implement for secured computing and computer networks.
5.	Explain different security frameworks for different types of systems including electronic systems.
<b>Pre-Requisites</b>	

**B.Sc. in Information Technology (Cyber Security)**  
**Effective from academic session 2022-23**

Software Engineering Fundamentals		3 Hrs./week	
Contents		Hours	Marks
Chapter	Name of the Topic	Hours	Marks
01	Defining computer security, the principles of secure software, trusted computing base, etc, threat modelling, advanced techniques for mapping security requirements into design specifications. Secure software implementation, deployment and ongoing management.	7	14
02	Software design and an introduction to hierarchical design representations. Difference between high-level and detailed design. Handling security with high-level design. General Design Notions. Security concerns designs at multiple levels of abstraction, Design patterns, quality assurance activities and strategies that support early vulnerability detection, Trust models, security Architecture & design reviews.	7	14
03	Software Assurance Model: Identify project security risks & selecting risk management strategies, Risk Management Framework, Security Best practices/ Known Security Flaws, Architectural risk analysis, Security Testing & Reliability (Penn testing, Risk- Based Security Testing, Abuse Cases, Operational testing , Introduction to reliability engineering, software reliability, Software Reliability approaches, Software reliability modelling.	7	14
04	Software Security in Enterprise Business: Identification and authentication, Enterprise Information Security, Symmetric and asymmetric cryptography, including public key cryptography, data encryption standard (DES), advanced encryption standard (AES), algorithms for hashes and message digests. Authentication, authentication schemes, access control models, Kerberos protocol, public key infrastructure (PKI), protocols specially designed for e-commerce and web applications, firewalls and VPNs. Management issues, technologies, and systems related to information security management at enterprises.	8	14
05	Security development frameworks. Security issues associated with the development and deployment of information systems, including Internet-based e-commerce, e-business, and e-service systems, as well as the technologies required to develop secure information systems for enterprises, policies and regulations essential to the security of enterprise information systems.	7	14
	<b>Sub Total:</b>	<b>36</b>	<b>70</b>
	<b>Internal Assessment Examination &amp; Preparation of Semester Examination</b>	<b>4</b>	<b>30</b>
	<b>Total:</b>	<b>40</b>	<b>100</b>

**Practical:**

**Skills to be developed:**

Intellectual skills:

1. To identify the various requirement development activities viz. elicitation, analysis, specification and verification for the given scenarios.
2. To identify the role of the software in today's world across a few significant domains related to day to day life
3. To identify the suitable software development model for the givenscenario

**List of Practical:** Based on theory lectures.

**Assignments:**

Adhered to theory curriculum as conducted by the subject teacher.

**List of Books**
